PREFACE

The newly developed provisional Central Product Classification (CPC) constitutes a complete product classification covering goods and services. In developing CPC, the main intention was to provide a general framework for international comparison of data from various types of statistics that present data by kinds of product. Therefore, one of the main characteristics of CPC as a general-purpose classification is that it provides less detail than the other specific classification systems in areas or for applications for which such systems are available.

The final draft of the provisional Central Product Classification was considered and approved by the Statistical Commission at its twenty-fifth session in February 1989./1/ In approving the final draft of the provisional CPC, the Statistical Commission recommended to the Economic and Social Council that the Council adopt the following resolution, which the Council, then adopted on 22/May/1989, as its resolution 1989/3. It is reproduced below in its parts relevant to CPC.

"The Economic and Social Council,

Recalling resolution 4/(XV) adopted by the Statistical Commission at its fifteenth session, in 1968,

Considering:

...

(g) The proposed new Central Product Classification, as described in the report of the Secretary-General, to be known as the provisional Central Product Classification,

1. Recommends that Member States:

...

(b) Make use of the provisional Central Product Classification in order to gain experience in obtaining international comparability for data classified according to goods and services;

2. Requests the Secretary-General:

...

(b) To prepare a publication on the provisional Central Product Classification, together with the explanatory notes for the services part of the Classification, based on the provisional text before the Statistical Commission at its twenty-fifth session and in the light of the conclusions of the Commission;

(c) To publish and circulate/... the provisional Central Product Classification and to bring [it] to the attention of States Members of the United Nations or members of the specialized agencies for adoption."

CPC is a classification that is intended to play a central role in relating different types of international economic classifications and to serve a variety of purposes. Indeed, it has already become an important tool in the decade-long programme on harmonization of international economic classifications. Other United Nations classifications included in the programme were the third revision of the Standard International Trade Classification (SITC, Rev.3) which was approved by the Statistical Commission at its twenty-third session in 1985 and published in 1986./2/ and the International Standard Industrial Classification of All Economic Activities (ISIC, Rev.3), which was approved by the Statistical Commission at its twenty-fifth session in 1989, together with CPC, and published in 1990./3/ One of the basic aims in developing CPC was to combine the main classification principle following ISIC, Rev.3 (i.e. classification by principal industry of origin of the products considered), with criteria applied in the Harmonized Commodity Description and Coding System/(HS) of the Customs Cooperation Council/4/ and in SITC, Rev.3 (i.e. classification according to physical properties of the products). Criteria of the type used in HS and SITC, Rev.3, have been especially important in developing the part of CPC dealing with transportable goods, which is based completely on the most detailed subdivisions of the HS as building blocks. As SITC is also based on HS, all these classifications are completely compatible.

The name "Central Product Classification" is intended to indicate that the purpose of CPC is to provide a framework for international comparison of various kinds of statistics dealing with goods, services and assets. Basically, CPC is intended to be used for different types of statistics, for example, industrial statistics and national accounts, price statistics, foreign trade statistics (including trade in services) and balance-of-payments statistics.

Another main characteristic of CPC is that it contains a description of services. No international classification of services covering the whole spectrum of outputs of heterogeneous service industries and serving the different analytical needs of the various types of statistics has been available until now. Rapid technological progress in many service industries has led to new services and service packages being offered, such as financial services, computer services, consultancy and advisory services in many fields, technical services and other business services. For data collection and compilation on such outputs, it is essential to attempt to describe these services as accurately as possible to clarify the

basic underlying concepts. Therefore, in the final stage of the long-term process leading to the third revision of ISIC and the development of CPC, the importance of improving service classifications as a precondition for improving service statistics in general was fully recognized and given high priority in international meetings.

Development of service classifications and related explanatory notes was the main agenda item at the early meetings of the Voorburg Group on Service Statistics. In this Group a number of countries constituted themselves to share the workload and volunteer resources for advancing work on the various aspects of service statistics. As far as classification work was concerned, this meant contributing proposals for service classifications and related explanatory notes. Without these voluntary contributions by countries, it would hardly have been possible to complete the part of CPC dealing with services. Particular acknowledgements go to the National Statistical Offices of a number of countries for preparing selected listings of services for CPC with the explanatory notes pertaining in the context of the Voorburg Group on Service Statistics. They are Australia: divisions 82/(Real estate services) and 83/(Leasing or rental services without operator); Canada: divisions 75/(Telecommunications services), 86/(Legal, accounting, auditing and bookkeeping services; taxation services; market research and public opinion polling services; management and consulting services; architectural, engineering and other technical services) and 87/(Business services n.e.c.); Hungary: divisions 96/(Recreational, cultural and sporting services) and 97/(Other services); Japan: divisions 84/(Computer and related services), 85/(Research and development services), 87/(Business services n.e.c.) and 96/(Recreational, cultural and sporting services); the Netherlands: division 93/(Health and social services); Sweden: divisions 75/(Post and telecommunications services) and 84/(Computer and related services); and the United Kingdom of Great Britain and Northern Ireland: division 81/(Financial intermediation services and auxiliary services therefor). In some cases, these contributions have been subject to editorial amendments. Some other parts of the explanatory notes were developed by the United Nations Secretariat.

Together with the third revision of ISIC, the development of CPC is the outcome of a decade-long review process during which experts from countries with various types of economic systems and at various stages of development from all regions of the world, as well as experts from international organizations, endeavoured to solve the outstanding issues. The central role during the process of harmonization of international economic classifications was played by the Joint Working Group on World Level Classifications of the Statistical Office of the United Nations Secretariat and the Statistical Office of the European Communities, which met six times, and the three meetings of the United Nations Expert Group on Harmonization of Economic Classifications. All the experts and organizations involved in the development process of CPC deserve credit and acknowledgements. Among them, Walter/Neece of the United States Bureau of the Census made particular contributions in the final stage of work by commenting in detail on the Introduction to CPC, on the classification structure, and on those parts of the explanatory notes that were circulated during the twenty-fifth session of the Statistical Commission in February/1989.

The publication of the provisional CPC consists of four parts. Part/One contains the Introduction to CPC, which provides basic information on its conceptual background. Topics dealt with include background information on the Programme on Harmonization of International Economic Classifications; the purpose and nature of and classification principles used in constructing CPC; its relationship with HS and SITC, Rev.3, as well as with ISIC, Rev.3; selected issues related to the application of CPC in the System of National Accounts (SNA);^{5/} applications of CPC, including its use in establishing related national classifications; and a brief description of supplementary materials of importance for the interpretation of CPC. Part/Two shows (a)/the broad structure at the one- and two-digit levels together with a synoptic table giving the number of further subdivisions at the more detailed levels of classification; and (b)/the detailed classification, covering transportable goods (sects./0-4), non-transportable goods (part of sect./5), and services (part of sect./5, sects./6-9). For the part dealing with transportable goods, the correspondence with HS and SITC, Rev.3, is also shown in separate columns for each subclass (five-digit category) of CPC, whereas the industrial origin in terms of ISIC, Rev.3, is indicated throughout. Part/Two also includes three annexes: for energy related products (annex/I) and tourism related services (annex/II). These are the product-side counterparts of the annexes included in the ISIC, Rev.3, publication. Annex/III contains categories of income and transfers, as requested by producers and users of balance-of-payments statistics. Part/Three consists of the explanatory notes for the services part of CPC (sects./5-9) that have been developed either by countries in the context of the Voorburg Group on Service Statistics or by the Secretariat. Part/Four comprises correspondence tables between ISIC, Rev.3, and CPC showing the linkage that exists between activities and their outputs at a broad level of aggregation. These correspondence tables are presented using the ISIC, Rev.3 and CPC framework as a starting point. More detailed information on these subjects can be found in the Introduction to CPC, and for Part/Four, in brief separate introductions.

Part One

AN INTRODUCTION TO THE PROVISIONAL CENTRAL PRODUCT CLASSIFICATION

I. HISTORICAL BACKGROUND

1. At the seventeenth session of the Statistical Commission in 1972, 1/ the twenty-first session of the Conference of European Statisticians in 1973 and meetings of members of both bodies with the secretariats of international organizations, there was general agreement on the need to improve harmonization among the various classifications in the economic field (and, where appropriate, in other fields) that had been prepared under the auspices of the United Nations and other international bodies.

2. In May 1973 the Customs Cooperation Council (CCC) undertook responsibility for the revision of its nomenclature (CCCN) and its extension from a four-digit system, containing 1,011 headings, to a six-digit system now containing 1,241 four-digit headings, which are further subdivided into 5,019/six-digit subheadings. The new nomenclature is called the Harmonized Commodity Description and Coding System (HS). 2/ At the request of the Statistical Commission and the invitation of the CCC the Statistical Office of the United Nations Secretariat participated intensively in the development of the HS, mainly in order to ensure that when making dissections the HS would take into account as much as possible continuity with the Standard International Trade Classification (SITC), Revision 2./3/ and the industrial origin of the goods. The HS was approved by CCC in June 1983 and entered into force in January 1988.

3. In 1974 the Statistical Office of the United Nations Secretariat, at the request of the Statistical Commission at its seventeenth session, 1/ convened an Expert Group to make recommendations to enhance the harmonization of international statistical classifications and to frame recommendations in the form of a work programme. On the basis of the Group's report, the Commission, at its nineteenth session, approved a programme to harmonize the existing activity classifications of the United Nations, the European Communities (EC) and, if possible, the Council for Mutual Economic Assistance (CMEA) and, simultaneously, to develop a system of different but interrelated classifications of economic activities and goods and services. 4/ Development of a new classification covering both goods and services (products)/- the Central Product Classification (CPC)/- was intended to provide a basic tool in this programme. The product classifications were to use the detailed subheadings of the HS as building blocks for the part dealing with transportable goods and to take into account the basic categories of economic supply and use as specified in A System of National Accounts (SNA),/5/ namely, intermediate consumption, final consumption, capital formation and imports and exports. Also SITC, when being revised, was to become part of this programme of harmonization. The Statistical Commission endorsed the programme and supported its continuation at subsequent sessions with the provision that existing systems were to maintain their essential character. 6/

4. In 1977 the Statistical Office of the United Nations Secretariat and the Statistical Office of the European Communities (EUROSTAT) convened a Joint Working Group on World Level Classifications, which met six times in Brussels and Luxembourg during the period 1977-1987. It was agreed that this Group would develop an Integrated System of Classifications of Activities and Products (SINAP) which would serve as an interim classification, its categories being used as building blocks for the revision of the International Standard Industrial Classification of All Economic Activities (ISIC), Revision/2;/7/ the General Industrial Classification of Economic Activities within the European Communities (NACE), 8/ and, if possible, the Classification of Branches of the National Economy (CBNE) 9/ of the State members of the CMEA; and for related classifications of goods and services. In the course of its work, the Group also contributed some proposals for the Standard International Trade Classification, Revision 3./10/ especially on the relationship between SITC and CPC.

5. Subsequently, the Statistical Office of the United Nations Secretariat organized a series of related expert group meetings dealing with economic classifications, which met at United Nations Headquarters in New York in December/1983, April and May 1986 and April 1988. 11/ The composition of the Expert Group was roughly the same as that of the United Nations Statistical Office/Statistical Office of the European Communities Joint Working Group, so that continuity of work was ensured. In both groups, experts from countries in different parts of the world and from countries at various stages of development were represented, as well as regional commissions and international organizations. The main task of the meetings was to review the drafts of ISIC, Rev.3, and the related CPC prepared by the Statistical Office, and to advise the Statistical Office and the Statistical Commission on how to improve these drafts.

6. At its twenty-third session in 1985 the Statistical Commission approved the third revision of SITC and confirmed that the degree of harmonization reached between SITC, CPC and ISIC was in accordance with its strategy previously approved (see para. 3 above). The Commission recommended that Member States should report internationally data on external trade statistics according to the SITC, Rev.3, as far and as soon as possible and requested the Secretary-General to arrange that, beginning not later than with data for the full year 1988, the publication of external trade data by United Nations bodies should be, as far as possible, in the form of SITC, Rev.3./12/

7. At its twenty-fourth session in 1987, the Statistical Commission reviewed the first complete draft of the CPC. It endorsed the continuation of work on CPC by the Statistical Office of the United Nations Secretariat in conjunction with appropriate international organizations, in particular EUROSTAT, the Organisation for Economic Cooperation and

Development (OECD) and the CMEA. It requested that the final draft be submitted to the Statistical Commission at its twenty-fifth session in 1989.

8. The Joint Working Group on World Level Classifications at its sixth session, in December 1987, and a United Nations Expert Group meeting in April/1988 reviewed subsequent drafts of the CPC. The Expert Group on Harmonization of Economic Classifications recommended that the acronym CPC for Central Product Classification be included in the title regardless of the language so that for example the French title could read "Classification Centrale de Produits (CPC)". This would facilitate international understanding when referring to the classification.

9. On the basis of recommendations made at these meetings the final draft was then prepared by the Secretariat for submission to the Statistical Commission with the request that the Commission approve the draft provisionally so that it could be published and used around the world. The Commission, at its twenty-fifth session, approved the final draft of the provisional CPC, modified to take into account comments by the Commission, and recommended that member States make use of the classification as a provisional classification in order to gain experience in obtaining international comparability for data according to goods and services. ^{13/} In this way a sound basis for any needed revisions in the CPC would be achieved. At the same session the Statistical Commission approved the third revision of ISIC.

II. UNDERLYING PRINCIPLES OF THE CLASSIFICATION

A. Purpose and nature of the classification

10. The purpose of CPC is to provide a framework for international comparison of statistics dealing with goods, services and assets and to serve as a useful guide for countries developing or revising an existing scheme in order to make it compatible with the international standard.

11. The Expert Group Meeting on the Harmonization of Statistical Classifications in 1976 considered that CPC as a standard central product classification was not developed for a single programme but was meant to be designed as an instrument for assembling and tabulating all kinds of statistics that needed product detail. ^{14/} Such statistics may cover production, intermediate and final consumption, capital formation and foreign trade and may refer to commodity flows, stocks or balances and may be compiled in the context of input-output tables, balance-of-payments and other analytical presentations.

12. CPC is seen as supplementary to other recommended classifications (such as SITC, Rev.3, for foreign trade statistics); it provides a basis for recompiling basic statistics for analytical use from their original classifications into a standard classification (CPC). CPC was developed primarily to enhance harmonization among various fields of economic and related statistics and to strengthen the role of the national accounts and balances as an instrument for coordination of economic statistics.

13. CPC includes categories for all products that can be the object of a domestic or international transaction or that can be entered into stocks. Furthermore, not only products that are an output of economic activity are represented, including transportable goods and non-transportable goods and services, but also non-produced assets, including land and assets that arise from legal contracts, such as patents, licences, trademarks and copyrights (intangible assets). Although the non-produced assets are not regarded as products in the System of National Accounts (SNA), it was considered useful to include them in the CPC because there is substantial national and international trade in them, and many users are interested in such data.

14. In the long run CPC may contribute to a reduction of the number of product classifications used internationally. As a general-purpose product classification, it may serve as a guideline for future product-type classifications for specific areas in the economy. Such specific classifications should be compatible with the general framework of CPC so that comparability of data will be ensured.

B. The Harmonized Commodity Description and Coding System (HS)

15. The CPC categories for transportable goods are defined in such a way that each consists of the goods of one or more complete HS six-digit category. It is thus essential to describe the HS briefly.

16. The HS evolved from the customs tariff nomenclature of the Customs Cooperation Council. The original customs tariff nomenclature of the Council was the 1955 Brussels Tariff Nomenclature (BTN). The main requirements for the classification were that goods should be classified according to objective criteria and that the classes be simple, precise and objective in application. In particular, the following criteria were used: classification according to raw or basic material, classification according to the degree of processing, classification by use or function and classification according to economic activities. These principles were maintained in all subsequent revisions of the nomenclature. In 1974 the nomenclature was renamed the Customs Cooperation Council Nomenclature (CCCN). From 1961 onwards efforts were made to harmonize BTN/CCCN and SITC; these led to an improvement of the correlation. At each revision of either nomenclature the correlation was improved, with the result that in 1978 the Council introduced in CCCN/1,083 statistical subheadings within 262 of its 1,011 headings which were in perfect correlation with SITC, Rev.2.

17. In 1970 the Council set up a study group to explore the feasibility of developing a harmonized commodity description and coding system that could simultaneously meet the needs of customs, external trade statistics and carriers. The Group reported in 1973 that such a system was not only feasible, but was essential in the longer-term interests of facilitating international trade. The Council provided for creation of a Harmonized System Committee, which then developed the System based largely on CCCN and SITC, Rev.2. HS is a revision and extension of CCCN, modifying existing four-digit headings and introducing six-digit subheadings in many cases.

18. The HS was implemented in accordance with a Convention adopted by the Council in June 1983, which entered into force as of 1 January 1988. The system contains 21 sections, 97 chapters and 1,241 headings at the four-digit level, 930 of which are further divided into subheadings. In total there are 5,019 separate categories of goods identified by a six-digit code. Besides the nomenclature itself, the International Convention on the Harmonized System contains legal rules of interpretation and the principles agreed to by contracting parties for administering the system. In addition, the CCC has developed a very elaborate set of explanatory notes and an alphabetical index to aid in use and interpretation. It should be noted that the Convention, in article/3.1(b), requires that "each Contracting Party shall ... make publicly available its import and export trade statistics in conformity with the six-digit codes of the Harmonized System, or, on the initiative of the Contracting Party, beyond that level, to the extent that publication is not precluded for exceptional reasons such as commercial confidentiality or national security". 15/

19. In developing HS the Customs Cooperation Council agreed, in principle, to introduce the industrial origin criterion in its construction 16/ i.e. each subheading of the HS, ideally, should contain only goods that are normally produced by a single industry. This principle was followed as far as possible. Exceptions occurred for many reasons. In some cases it was considered impossible for customs to make this distinction on the basis of the physical properties of a good, or the distinction would lead to categories that were too unimportant in international trade. In others the historical and legal distinctions administering customs and trade requirements took precedence over what might have been more useful from the standpoint of industrial origin. In some cases it was not clear where products would fall in the HS. It was also important that different countries, with different industrial organizations, could differ on what was necessary to meet the intention.

20. During the twenty-third session of the Statistical Commission in 1985 there was strong support for the recommendation to the Customs Cooperation Council to ensure that its future revision of HS would take into account, to the extent possible, the industrial origin of goods and the representative of the Council promised cooperation in that field. 17/ The Council plans to allow for updating the HS every three or four years, and has recommended that statisticians become involved as much as possible in the work of the Harmonized System Committee both through their national delegations and through international organizations. In this context, the Council invited statisticians from member States and the Statistical Office of the United Nations Secretariat to participate in the meetings of the Review Subcommittee for updating HS in order to ensure that the updating of the HS will not create a loss of relationship between itself and other international classifications./18/

C. Principles used in constructing CPC

21. The CPC is a system of categories covering both goods and services that is both exhaustive and mutually exclusive. Consistent with the other principles used, homogeneity within categories is maximized. CPC categories for transportable goods are based on the physical properties and the intrinsic nature of the products, as in the HS. To some extent this also applies to their aggregations, but additionally a close relationship with the ISIC (industrial origin criterion) is maintained. Moreover, for the part dealing with transportable goods, the CPC, with one exception, uses the headings and subheadings of the HS as building blocks, i.e., each CPC subclass is an aggregate of one or more headings or subheadings of the HS. An advantage of this relationship is that since the HS is used in many countries for international trade statistics and in some countries for production statistics, the introduction of the CPC in those countries is facilitated.

22. The one exception is the subdivisions of CPC group 333 (refined petroleum products). The entire group equals HS heading 2710 which is not further subdivided into subheadings because no agreement could be reached on how to do so and no definitions could be made which satisfied customs requirements. The CPC has subdivided this group into eight non-divided classes. These classes are the same as those existing in SITC, Rev.2, and SITC, Rev.3.

23. The expression "physical properties and intrinsic nature" means criteria that are proper to the goods themselves, e.g., the raw materials of which they are made, their stage of production, the way in which they are produced, the purpose or user category for which they are intended, the prices at which they are sold, whether or not they can be stored etc. The way products are produced is not necessarily the same as the industrial origin, although they very often coincide. Sometimes an industry produces goods of a totally different nature, for example meat and hides, which are both produced by slaughterhouses. These products are not put together in one category or even in the same section of the CPC. Thus, unprocessed hides are considered raw animal materials and are classified in section/0 (Agriculture, forestry and fishery products), whereas meat is classified in section 2 among food products.

24. Similar problems concerning industrial origin arise when industries produce both goods and services. Examples of such services are repair, maintenance and manufacturing on a fee or contract basis. Although the industrial origin of these services is often the same as the origin of the goods themselves, it should be clear that the nature of the services

involved may be markedly different from that of the goods, so that the goods and services should be classified under different parts of the CPC. These services are therefore given a separate division (88) in the classification.

25. The ISIC itself provides a framework for structuring production activities according to industries, and in doing so it uses the industrial origin of products as one criterion among others for classifying activities. Accordingly, there is no one-to-one correspondence between CPC and ISIC. It has often been suggested that such a relationship should exist because it would link the products directly to their producers. Such a relationship, however, has a number of disadvantages as well. It would lead to inadequate description of CPC categories, especially at the higher levels, and to unrealistic aggregates; it would also make harmonization with the SITC more difficult than necessary. It was also recognized that the relationship between industries and their products is a complex one and is not always stable. Lastly, the CPC is meant to be used not only for production statistics but also for other kinds of statistics, as was mentioned above (paras./11 and 12). For these reasons it was decided to give priority to the nature of the products rather than to their industrial origin.

26. Although not the sole criterion used, the industrial origin of goods and services was, nevertheless, considered to be important in developing the CPC. Its importance was recognized by attempting to group into one CPC subclass only those products that are produced by a single industry. However, since all CPC categories in the goods area are aggregates of HS subheadings, and since the criterion of origin was not always taken into account in the HS, the industrial origin principle could only be applied in so far as the HS allowed it. Through its linkage to the ISIC such criteria as the input structure, the technology and the organization of production are also reflected in the CPC.

27. With a view to accommodating users of CPC who want to identify a direct relationship between CPC and ISIC, each CPC subclass is accompanied in this publication by a reference to the ISIC industry in which most of the goods or services in question are generally produced. By rearranging the CPC according to this ISIC reference one finds the main goods or services that are the output of a certain industry. It should be realized, however, that this ISIC code refers to the principal producing industry of the CPC category. In some cases, some products are included in the CPC category even if they have a different industrial origin. Additionally, where the HS does not follow the industrial origin criterion, products with different industrial origin may be included in a single CPC subclass. Also, not all ISIC classes can be cross-classified with CPC. This will arise when some goods or services are produced in a way that their industrial origin is no longer recognizable in the products themselves, or the HS may not make such a distinction. For instance, in only a very few cases does the HS distinguish between metal products of cast iron and other metal products. Moreover, many products made by casting are classified in the HS as parts of machinery or other goods. As a result, the CPC does not have a separate category for products of cast iron and no reference is made to ISIC group 273 (Casting of metals). Such products are included in categories that contain similar products whether or not cast. Similarly, identical retail trade services are provided by both non-specialized stores and specialized stores and identical products are also sold by non-store retailers. In the CPC, the ISIC codes shown next to these service categories refer to the specialized stores only, because such reference is more specific. As a result no ISIC reference to non-specialized stores (ISIC group 521) will be found in CPC.

D. Goods and services in CPC

28. Much has been written and stated about the difference between goods and services. Several criteria are used in different circumstances: e.g.,/tangible versus intangible, storable versus non-storable or transportable versus non-transportable. Most of these criteria hold in the majority of cases, but there are always exceptions or borderline cases which cannot be simply resolved. Based on the variety of criteria used and the diverse experience around the world, it appears that no single criterion provides a valid, practical and unambiguous basis for distinguishing between goods and services in all cases. Examples of borderline situations are photographs, computer tapes and meals or drinks in restaurants. In these cases as well as others, a bundle, i.e. a combination or mixture of products, is sold and more often than not this bundle consists of a tangible and an intangible component. In the case of meals or drinks consumed in a restaurant, for example, the tangible component would be the foods and beverages consumed, and the intangible component the cooking and serving services, the seating and the locality of the restaurant. The purchaser of such a "mixed product" usually does not give much thought to whether a good or a service is purchased. The customer in a bookshop wants to buy a good and is probably not aware of the services provided by the author, the publisher, and the retail salesman. On the other hand, the person who has a pair of shoes resoled probably regards the transaction as a purchase of a service and does not think of the pieces of leather that are involved. In the case of a restaurant meal the situation is more ambiguous and varied with respect to the goods portion of the transaction compared to the service portion.

29. The precise distinction between goods and services is interesting from a theoretical point of view and may be relevant for the compilation and analysis of certain economic statistics. However, there is no need to embody such a distinction into a classification such as the CPC, which is intended to be for general purpose and to cover both goods and services. If an object does not fit into a category for goods, it must automatically fit into another category of the CPC, because everything that can be the object of a transaction is covered by the CPC.

E. Relationship to SNA

30. Within the framework of the SNA there is no distinction between goods and services, but there is a very elaborate

definition of "goods and services". From this definition in conjunction with the definition of the production boundary it can be concluded that services within households are excluded from the services area. Services within establishments are also excluded. Again these limitations may be important from a statistical point of view, but less from a classification point of view. In so far as such services are never objects of transactions there is no need to specify them in the CPC.

31. SNA clearly separates payments for non-factor services from remunerations of the production factors (salaries, interest, property etc.). Unrequited current transfers are also excluded from the goods and services definition. The CPC follows the same line: payments for factor services and transfers are not included in the classification. For practical reasons, however, they are added as an annex to the CPC (see para./60).

32. For international trade statistics a different distinction is made, i.e.,/between merchandise and non-merchandise. Merchandise is defined as "goods that add to or subtract from the stock of material resources of a country as a result of their movement into or out of the country". 19/ This definition coincides more or less with the CPC sections 0 through 4, although there are many exceptions. It should be realized that when discussing international trade in services what is often meant is not only non-factor services, but everything that is non-merchandise, even including payments for factor services and transfers.

F. Coding system of the classification

33. The coding system of CPC is hierarchical and purely decimal. The classification consists of sections (identified by the first digit), divisions (identified by the first and second digits), groups (identified by the first three digits), classes (identified by the first four digits) and subclasses (identified by all five digits, taken together). The codes for the sections range from 0 through 9 and each section may be divided into nine divisions. At the third digit of the code each division may, in turn, be divided into nine groups which then may be further divided into nine classes and then again into nine subclasses. In theory, this allows for 65,610 categories. In practice, however, there are 10 sections, 69 divisions, 293 groups, 1,050/classes and 1,811 subclasses. The code numbers in CPC consist of five digits without separation of any kind between digits. This coding system was chosen to avoid possible confusion with code numbers used in the SITC that uses a point to the right of the third digit.

34. At some point it was suggested that code numbers for CPC be made identical with those of ISIC at least at the two-digit level, using the same tabulation codes (letters) for the sections. This was, however, intentionally not done for fear that CPC would be perceived as a mere extension of ISIC, i.e.,/a list of goods and services, produced by a certain ISIC industry. This perception would greatly detract from the intended purpose of CPC, which is to be a classification in its own right. In addition, it would enforce the erroneous impression that all products covered by the related CPC categories were products of the ISIC to which they were numerically tied.

35. Where a given level of classification is not further subdivided, a "0" is used in the position for the next more detailed level. For example, the code for subclass "Unmanufactured tobacco" is 01700, since the group "Unmanufactured tobacco (code 017) is divided neither into classes nor into subclasses. The subclass "Bituminous or oil shale and tar sands" is coded 12030, as the division "Crude petroleum and natural gas" (code 12) is not divided into groups but directly into classes. The class "Bituminous or oil shale and tar sands" (code 1203) is then again not further subdivided.

36. For use in computers the "0" can also indicate that the code is used for a total of all more detailed categories. Thus, the code 2610 could indicate the total of all categories 2611 through 2619, while 34600 could represent the total of all categories 34611 through 34620.

III. APPLICATION OF THE CLASSIFICATION

A. General remarks

37. At its twenty-fifth session in 1989 the Statistical Commission requested that the Statistical Office of the United Nations Secretariat publish and circulate CPC and that it be called to the attention of the States Members of the United Nations and the specialized agencies. The Commission also recommended that Member States make use of CPC as a provisional classification in order to gain experience in obtaining international comparability for data according to goods and services.

B. Use of different levels of the classification

38. Different uses and types of statistics are best served by presenting statistics in terms of different levels of aggregation. Thus it may be necessary or desirable to use a classification such as CPC at different levels of detail for different purposes; for example, it may not be necessary for the purposes of national accounting to classify data at the level of detail required for industrial statistics purposes. Similarly, data on production obtained from establishment inquiries can usually be classified in far more detail than data on capital formation obtained from administrative reporting systems. The CPC furnishes a framework for comparable classifications of data at differing levels of detail, because of its hierarchical structure.

C. Using CPC in establishing related national classifications

39. Many countries that do not have the experience or resources to develop their own national product classifications, or that want their national product classifications to be related to the relevant international classifications as closely as possible, may choose to use CPC as their national classification. In such cases CPC may be used as is or it may be expanded or contracted, depending on the economy and other circumstances of the country.

40. For a national product classification to be convertible to CPC, the most detailed categories of classification in the national scheme should coincide with, or be subdivisions or combinations of, the individual subclasses of the CPC. In other words, each of the most detailed categories of the national product classification should not cover selected portions of two or more subclasses of the CPC, but should in general be part of the same class of the CPC. As long as these requirements are observed, the convertibility of the national product classification to the CPC would not be affected by the position of the categories at the most detailed level of classification in the national scheme or the manner of their grouping.

41. If it is so desired, classifications based on the CPC may be constructed by subdividing each subclass into as many as nine subcategories. This may be done by appending one decimal place to the CPC five-digit code. Alternatively, the subdivision of classes into subclasses in the CPC may, in some cases, be expanded by replacing the subclasses with a greater number of more detailed categories. Where this approach is employed, the more detailed subclasses may be identified by means of five digits as long as no more than nine subclasses are required for each class of the CPC. In order to preserve comparability with the subclasses of the CPC, the more detailed subcategories should be so delineated that they may be aggregated into subclasses of the CPC. It is preferable that the additional subdivisions of the expanded classification be part of the same class of the international classification.

42. Some countries may wish to contract the CPC detail. Some categories may be relatively unimportant in that country or cannot be distinguished through statistics that are routinely available; for example, some countries may find it impracticable to establish categories in their national classifications which are similar to the individual categories of divisions 43 through 46 (machines). They may find it appropriate for their purposes to combine some, or all, of the subclasses or classes in each of these divisions into single categories at the most detailed level of classification of their national scheme. Contractions should ideally (a) combine complete CPC categories, (b) combine categories at the same CPC level, and (c) combine categories within the existing CPC hierarchical structure.

IV. RELATIONSHIP OF CPC TO OTHER CLASSIFICATIONS

A. General remarks

43. The Statistical Commission requested the preparation of statistical classifications that together would form an integrated system for measurement of activities, goods and services and which could be used in various kinds of economic and related statistics. The work resulted in the revision of ISIC and SITC and the development of CPC. ISIC represents the activity side of the system; CPC is the general classification for goods and services and SITC is a special statistical classification for transportable goods in international trade. All three classifications are strongly interrelated.

44. CPC also interrelates with a number of other classifications, either directly or indirectly. These other classifications include the HS, the Classification by Broad Economic Categories (BEC),^{20/} and the Combined Nomenclature (CN)^{21/} of the European Communities which meets at one and the same time the requirements both of the Common Customs Tariff and of the external trade statistics. SITC also interrelates in a precise way with these classifications; the BEC is in fact defined in terms of the SITC. There is no direct relationship with the Classification of the Functions of Government (COFOG),^{22/} the International Standard Classification of Education (ISCED),^{23/} or the International Standard Classification of Occupations (ISCO),^{24/} because the units of classification used in these classifications are not goods or services. It may be noted, however, that ISIC is sometimes used to classify employed persons in terms of the industry in which they work. In terms of this use of ISIC, ISCED and particularly ISCO are closely related. In any case, COFOG, ISCED and ISCO served as background information when drafting the CPC.

B. Relationship of CPC to ISIC

45. Each subclass of the CPC consists of goods or services that are predominantly produced in one class of ISIC. This predominant ISIC class is shown in the first column next to each CPC subclass. By using this kind of correlation table in the reverse way, i.e., from ISIC to CPC, one can usually find which products are the characteristic outputs of a certain industry. This procedure, however, will not always be successful for the reasons explained in paragraphs 19 and 27.

C. Relationship of CPC to HS and SITC

46. A very strong relationship exists between the CPC and the HS for transportable goods where the CPC is almost always a grouping and rearrangement of complete categories of the HS. In the present publication this relationship is indicated in the second column by a reference next to each CPC subclass to the HS headings or subheadings which define the CPC category. In all but one case the headings or subheadings of the HS are not further divided. The only exception to this is the category for refined petroleum oils, CPC 333 (see para. 22 above).

47. The relationship between CPC and SITC is very similar to the one between CPC and HS. For transportable goods, all 5-digit items of the SITC are equal to or an exact part of a single CPC subclass. In this case there is also a reverse relationship in that each subclass of the CPC is part of only one SITC 3-digit group. In other words, complete CPC subclasses can be aggregated into one SITC group. The correlation between CPC and SITC, Rev.3, is shown in the third column of the classification. Since the SITC deals only with transportable goods, no correspondence between CPC and SITC exists for the remainder of the CPC.

D. Relationship of CPC to other classifications of goods and services

48. The remaining major United Nations classifications dealing with goods and services are the Classification by Broad Economic Categories (BEC) and the classifications contained in tables 6.1 and 6.3 of the SNA, Rev.3.

49. The BEC is designed to serve as a means for converting external trade data compiled on the SITC into end-use categories that are meaningful within the framework of the System of National Accounts (SNA), namely categories approximating the three basic classes of goods in the SNA, capital goods, intermediate goods and consumption goods./25/ These three main end-use categories are further subdivided in BEC into a total of 19/categories. Through the correlations between CPC and SITC and between SITC and BEC it generally becomes possible to rearrange whole CPC subclasses into BEC categories.

50. The current version of SNA (Rev.3) was developed long before the CPC. Therefore, it does not include specifically a classification by type of product similar to CPC. It may include breakdowns that may be related to CPC; for example, table/6.1 of the present SNA contains a scheme to be used for classifying the outlays on goods and services by households in the domestic market for purposes of final consumption according to the major object (i.e., the purpose) for which the goods and services are acquired. Table 6.3 provides for a classification of gross fixed capital formation by type of fixed assets. A fourth revision of the SNA is being prepared. It is expected that the new version will include explicitly a product classification harmonized with the CPC, either by using its categories directly or by referring to them.

51. For many years the European Communities used the nomenclature of goods for the external trade statistics of the Community and statistics of trade between Member States (NIMEXE) as a classification for external and intra-community trade statistics. From the beginning this classification used the CCCN as its basis to which some divisions for customs purposes as well as some statistical subdivisions were added. After the introduction of the HS this approach was continued. Since the beginning of 1988 the European Communities have been using a new international trade classification, the Combined Nomenclature (CN), which follows the principles used in developing the NIMEXE. Therefore, there is a straightforward relationship between the CPC and the CN, i.e., whole categories of the latter can always be rearranged into CPC subclasses. This is also the case with SITC, Rev.3.

52. From the beginning of the work on harmonization of economic classifications, the Statistical Commission emphasised that efforts be made to harmonize the United Nations classifications with those of the European Communities and, if possible, with those of the Council for Mutual Economic Assistance. Through the United Nations Statistical Office/Statistical Office of the European Communities Joint Working Group and the cooperation of all parties concerned, it was agreed that the revised NACE and the related product classification of the European Communities will be identical with or an extension of ISIC and CPC, respectively. The coding systems used in the classifications of the United Nations and the European Communities will be, as far as possible, the same. As a result, data of both organizations will be widely compatible.

53. In developing the structure of the CPC categories for section 5, "Construction work and constructions; land", and in defining their content, use has been made of the United Nations International Recommendations for Construction Statistics, 26/ and for "land", of the Standard Statistical Classification of Land Use,/27/ developed by the Economic Commission for Europe.

V. INTERPRETATION OF THE CPC SYSTEM

A. Indexes to the classification

54. To facilitate the use of a statistical classification such as CPC, e.g., for production statistics, it is essential to provide users with numerical and alphabetical indexes. Such indexes are of assistance not only in the process of classification itself, but also in adapting the classification to the requirements of individual countries and users, and in comparing it with other classifications of goods and services. It is intended that both numerical and alphabetical indexes to the CPC will be published separately upon completion. The numerical index will list entries according to the subclass of the CPC in which they are classified. The alphabetical index will list goods or services in alphabetical order together

with entries composed of such modifications or rearrangements of the wording of the original titles as are thought likely to be of use.

55. Until the numerical and alphabetical indexes become available, users of CPC can refer to the index that exists for HS and the planned index for SITC, Rev.3, for the transportable goods part of the CPC. The CCC prepared the former index. The latter is being prepared by the Statistical Office of the United Nations Secretariat with assistance of the Customs Cooperation Council and other international organizations. Through the correlation between these two classifications and the CPC, it should be possible to determine the correct CPC categories for most goods. It is intended to integrate the alphabetical indexes to CPC and SITC, Rev.3./28/ A new index will have to be developed for the part of the CPC dealing with services.

B. Explanatory notes

56. Since the CPC part covering transportable goods is defined in terms of HS, the texts, the legal notes, the interpretative rules and the explanatory notes of the HS also apply to the CPC. The texts of the CPC categories are often based on the HS, although in several instances these texts were somewhat shortened. When there is doubt about the contents of a goods category of the CPC the reference to the HS and thus to its heading text and explanatory material should help to resolve the matter. 29/ This should simplify operations related to the use of these classifications as well as enhance the comparability of the resulting data. Moreover, national experience in applying the HS is directly applicable for carrying out classification operations using the CPC.

57. At its twenty-fourth session in 1987 the Statistical Commission agreed that the explanatory notes of the HS should apply to the part of the CPC dealing with transportable goods, because those notes were well elaborated and because it might create confusion in the light of the reference material associated with the HS if new notes were drawn up. 30/ However, no such ready source of explanatory notes exists for the part of CPC dealing with non-transportable goods and services. At its twenty-fifth session in 1989 the Statistical Commission requested that a publication be prepared, with explanatory notes for the services part of the CPC classification, as a provisional document. With the help of experts and countries that also assisted in drafting this part of the CPC some interim notes have been developed. However, as the explanatory notes as a whole have not been subject to the international review process, they are to be considered tentative at this stage.

C. Rules of interpretation

58. As is the case with any widely used statistical classification, numerous situations can be expected to arise in the use of the CPC when it will be unclear as to which of two or more CPC categories a particular good or service should be assigned. These ambiguities may arise when the output of a transaction involves only a good (see A, below) or a service (see B, below), as well as when a combination of goods and services is involved (see C, below). In the next paragraph it is explained how to deal with such classification problems.

59. The following rules shall apply when classifying products according to the CPC:

A. Classification of goods in the categories of Sections 0 to 4 inclusive shall be determined by the corresponding classification in the Harmonized Commodity Description and Coding System (hereinafter referred to as the "Harmonized System"), which is governed by the Rules reproduced below.

General rules for the interpretation of the harmonized system

Classification of goods in the nomenclature shall be governed by the following principles:

1. The titles of sections, chapters and sub-chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to the following provisions:
2. (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished but in an unassembled or disassembled state.
- (b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance.
3. When by application of Rule 2(b) or for any other reason, goods are, prima facie, classifiable under two or more headings, classification shall be effected as follows:

- (a) The heading, which provides the most specific description, shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.
 - (b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, in so far as this criterion is applicable.
 - (c) When goods cannot be classified by reference to 3(a), or 3(b), they shall be classified under the heading that occurs last in numerical order among those which equally merit consideration.
4. Goods or services, which cannot be classified in accordance with the above Rules, shall be classified under the heading appropriate to the goods to which they are most akin.
 5. In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein:
 - (a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. The rule does not, however, apply to containers that give the whole its essential character;
 - (b) Subject to the provisions of rule 5(a), packing materials and packing containers presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision does not apply when such packing materials or packing containers are clearly suitable for repetitive use.
 6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading notes and, *mutatis mutandis*, to the above Rules, on the understanding that only subheadings at the same level are comparable. For the purposes of the Rule the relative section and chapter notes also apply, unless the context otherwise requires."
- B. Classification of services in the categories of Sections 5 to 9 inclusive shall be determined according to the terms of the categories as described in the sections, divisions, groups, classes or subclasses of the CPC.
1. When services are, *prima facie*, classifiable under two or more categories, classification shall be effected as follows, on the understanding that only categories at the same level (sections, divisions, groups, classes or subclasses) are comparable:
 - (a) The category, which provides the most specific description, shall be preferred to categories providing a more general description.
 - (b) Composite services consisting of a combination of different services that cannot be classified by reference to 1(a) shall be classified as if they consisted of the service that gives them their essential character, in so far as this criterion is applicable.
 - (c) When services cannot be classified by reference to 1(a) or 1(b), they shall be classified under the category that occurs last in numerical order among those which equally merit consideration.
 2. Services, which cannot be classified in accordance with the above rules, shall be classified under the category appropriate to the services to which they are most akin.
- C. Products comprising a bundle (combination) of goods and services shall be classified according to their main component (value added), in so far as the criterion is applicable.

VI. RELATED TOPICS

A. Annexes to the CPC

60. At its twenty-fourth session the Statistical Commission welcomed the inclusion of annexes to ISIC, covering

cross-classifications of industries for particular purposes. 31/ The purpose of these annexes is to come to an international understanding on which combination of categories could be regarded as useful for international compilation and analysis. When discussing this in expert group meetings, it was suggested that if annexes were to be made for the ISIC, they could be made for CPC as well. Accordingly, annexes for energy products, tourism and income and transfer categories are included (annexes I-III). In the annexes for energy products and for tourism, entire CPC categories are rearranged into product groups that relate to these two industries. The CPC annexes currently specify primary products of industries listed in the corresponding ISIC annex and, in addition, in the case of energy products, some trade and transport services. Secondary products of other industries are not included. The annex for income and transfer categories was added to the CPC at the request of experts involved in balance of payments and in national accounts statistics (see para./31). It was felt that for these kinds of statistics it would be convenient to be able to refer to an international classification such as the CPC even for their categories that do not deal with goods or services. Note that income and transfer categories belong neither to goods nor to services and are therefore not part of the CPC strictly speaking. For convenience, all categories in that annex (annex III) have been given the alphabetical prefix/"A".

B. The correlation tables

61. When drafting the CPC, efforts were made to establish a strong link with ISIC, Rev.3, and to ensure correspondence with the HS and with SITC, Rev.3. This is indicated in the present publication in three separate columns showing correspondences for each CPC subclass. It is intended that the correspondence tables among ISIC, Rev.3, CPC, SITC, Rev.3, and HS, from each of them to the other three classifications will be made available in a separate publication.

II. DETAILED STRUCTURE: SECTIONS, DIVISIONS, GROUPS, CLASSES AND SUBCLASSES

Annexes

CATEGORIES FOR SPECIAL PURPOSES

Pursuant to the recommendation of the United Nations Statistical Commission at its twenty-fourth session in 1987 to develop annexes to ISIC, Rev.3, for special purposes, and as a reflection of discussions at expert group meetings, annexes for energy related products, tourism related services and categories in balance of payments of income and transfers have been developed for CPC as well. As a general principle, the CPC annexes for energy related products and tourism related services follow the corresponding annexes to ISIC, Rev.3, the one for energy products being, however, slightly more expanded. The annex for income and transfer categories was added to CPC at the request of experts involved in balance of payments and national accounts, in order to extend the analysis to financial flows.

- I. ENERGY RELATED PRODUCTS
- II. TOURISM RELATED SERVICES
- III. CATEGORIES IN BALANCE OF PAYMENTS OF INCOME AND TRANSFERS

Annex I

ENERGY RELATED PRODUCTS

Efforts to delimit an integrated energy sector can be extended to the analysis of output categories of relevance to that industry as well, as defined by CPC. The following annex for energy related products covers first the outputs of activities included in the annex to ISIC, Rev.3, for energy related activities, i.e. products such as coal and lignite, crude petroleum and natural gas and uranium and thorium ores; electricity, town gas, steam and hot water; and coke oven products, refined petroleum products and nuclear fuel. Furthermore, as some services can be related more specifically to the energy sector than the activities from which they originate, owing to the more detailed breakdown in CPC, trade and transport services have also been included in the annex for energy related products. As excerpting the relevant categories from the main body of CPC has produced the annex, the same column headings also apply to annex I.

Annex II

TOURISM RELATED SERVICES

The growing importance of the tourism sector in many developing as well as developed countries has created a need for specific analysis of that sector from both the demand-side (surveys of visitors) and the supply-side (surveys of tourism enterprises). One possible approach for integrating the two sides of analysis is the use of output categories, as provided by CPC, for defining the tourism sector.

The OECD Tourism Committee and the World Tourism Organization (WTO) have carried out recent methodological work on tourism statistics. In cooperation with WTO an annex for tourism related services has been developed. The following annex constitutes the almost exact output-side counterpart of the annex to ISIC, Rev.3, for tourism related activities. It therefore includes hotel and restaurant services, transport, storage and communications services, and some recreational, cultural and sporting services. Additionally, some agricultural, mining and manufacturing services and some administrative services of the Government that relate specifically to the tourism sector are also covered in the annex. Again, as excerpting the relevant categories from the main body of the CPC has produced the annex, the same column headings also apply to annex II.

Annex III

CATEGORIES IN BALANCE OF PAYMENTS OF INCOME AND TRANSFERS

In order to extend the analysis and comparability of international transactions as recorded in the balance of payments to transactions other than those in goods and services, i.e. to financial flows as well, and in order to promote the use of CPC in national accounts and balance of payments statistics, a classification of income and transfer categories based on recommendations in the Balance of Payments Manual, fourth edition, is being presented below as annex III. As income and transfer categories belong neither to goods nor to services, and in order to indicate that in that annex a different coding system is being used, all categories in annex III have been given the alphabetical prefix "A". In the

process of ongoing work on the revision of the United Nations System of National Accounts and revision of the Balance of Payments Manual, the latter being carried out by the IMF, changes are likely to affect the classification of income and transfers that may be reflected in a possible later version of CPC.

EXPLANATORY NOTES FOR THE SERVICES LISTED IN CPC

SECTION 5 CONSTRUCTION WORK AND CONSTRUCTIONS; LAND

DIVISION 51 CONSTRUCTION WORK

Pre-erection work; new construction and repair, alteration, restoration and maintenance work on residential buildings, non-residential buildings or civil engineering works. This work can be carried out either by general contractors who do the complete construction work for the owner of the project, or on own account; or by subcontracting parts of the construction work to contractors specializing, e.g., in installation work, where the value of work done by subcontractors becomes part of the main contractor's work. The products classified here are services which are essential in the production process of the different types of constructions, the final output of construction activities.

511 Pre-erection work at construction sites

5111 51110 Site investigation work

Investigation work aiming at finding the most suitable site for a construction project, and demarcation work, i.e./demarcation of a locality where one or more major stages or processes of construction work are being carried on.

Exclusions: Test drilling services are classified in subclass 51130 (Site formation and clearance work). Architectural, engineering, surveying and mapmaking services are classified in group 867 (Architectural, engineering and other technical services).

5112 51120 Demolition work

Wrecking and demolition work of buildings, other structures and streets and highways, and sales of material derived from demolishing operations.

5113 51130 Site formation and clearance work

Preparation work aiming at making sites ready for subsequent construction work, including blasting, test drilling and rock removal work.

5114 51140 Excavating and earthmoving work

Excavating and digging work, earthmoving work, grading of construction sites and trench digging.

Exclusion: Foundation digging work is classified in subclass 51510 (Foundation work, incl. pile driving).

5115 51150 Site preparation work for mining

Tunnelling, overburden removal and other development and preparation work of mineral properties and sites, except for mining oil and gas.

Exclusion: Construction services incidental to oil and gas mining are classified in subclass 88300 (Services incidental to mining).

5116 51160 Scaffolding work

Scaffold erecting and dismantling work.

512 Construction work for buildings

5121 51210 For one- and two-dwelling buildings

Construction work (incl. new work, additions, alterations and renovation work) of residential buildings containing one or two dwellings.

5122 51220 For multi-dwelling buildings

Construction work (incl. new work, additions, alterations and renovation work) of residential buildings containing three or more dwellings.

- 5123 51230 For warehouses and industrial buildings
- Construction work (incl. new work, additions, alterations and renovation work) of warehouses and industrial buildings such as manufacturing and light industrial buildings.
- Exclusion: Construction work on certain specialized facilities for manufacturing is classified in subclass 51360.
- 5124 51240 For commercial buildings
- Construction work (incl. new work, additions, alterations and renovation work) of commercial buildings such as office buildings, bank buildings, parking garages, petrol and service stations, shopping centres and air, rail or road transport terminals.
- 5125 51250 For public entertainment buildings
- Construction work (incl. new work, additions, alterations and renovation work) of public entertainment buildings such as cinemas, theatres, concert halls, dance halls and nightclubs.
- Exclusion: Construction work on sport and recreation facilities is classified in class 5137.
- 5126 51260 For hotel, restaurant and similar buildings
- Construction work (incl. new work, additions, alterations and renovation work) of hotels, motels, inns, hostels, restaurants and similar buildings.
- 5127 51270 For educational buildings
- Construction work (incl. new work, additions, alterations and renovation work) of educational buildings such as schools, colleges, universities, libraries, archives and museums.
- 5128 51280 For health buildings
- Construction work (incl. new work, additions, alterations and renovation work) of health buildings such as hospitals and sanatoria.
- 5129 51290 For other buildings
- Construction work (incl. new work, additions, alterations and renovation work) of non-residential buildings not elsewhere classified, such as religious buildings and prison buildings.
- 513 Construction work for civil engineering
- 5131 51310 For highways (except elevated highways), streets, roads, railways and airfield runways
- Construction work of highways (except elevated highways), streets, roads, other vehicular and pedestrian ways, guardrails, railways and airfield runways.
- Exclusion: Construction work of elevated highways and of subways is classified in subclass 51320.
- 5132 51320 For bridges, elevated highways, tunnels and subways
- Construction work of bridges, viaducts, elevated highways, highway, pedestrian and railway tunnels, and subways.
- 5133 51330 For waterways, harbours, dams and other waterworks
- Construction work of waterways, harbours and riverworks, dams, irrigation and other waterworks.
- Exclusions: Construction work on pipelines and on water and sewer mains are classified in subclasses 51340 (For long distance pipelines, communication and power lines (cables)) and 51350 (For local pipelines and cables; ancillary works), respectively.
- 5134 51340 For long distance pipelines, communication and power lines (cables)
- Construction work of long distance overland or submarine pipelines and power and telecommunication transmission lines (cables).
- Exclusion: Construction work of local gas pipelines, water mains or communication transmission lines (cables) are classified in subclass 51350 (Construction work for local pipelines and cables; ancillary works).

- 5135 51350 For local pipelines and cables: ancillary works
- Construction work of local gas pipelines and water and sewer mains and local power and communication transmission lines (cables). Construction work of ancillary works such as transmission towers including antennas and transformer stations and substations for distribution within local boundaries.
- Exclusion: Construction work of long distance pipelines and cables are classified in subclass 51340.
- 5136 51360 For constructions for mining and manufacturing
- Construction work of constructions for mining and manufacturing not elsewhere classified, e.g. loading and discharging stations, winding-shafts, power plants, chemical plants, iron foundries, blast furnaces and coke ovens.
- Exclusion: Construction work for warehouses and industrial buildings is classified in subclass 51230.
- 5137 For constructions for sport and recreation
- 51371 For stadia and sports grounds
- Construction work of stadia and other grounds for sports generally played in the open air such as football, baseball, rugby, track and field, car or bicycle races and horse-races.
- 51372 For other sport and recreation installations (e.g. swimming pools, tennis courts, golf courses)
- Construction work of other sport and recreation installations. The sport installations classified here are mostly for indoor sports and provide less space for spectators, e.g. basketball courts, ice hockey rinks, swimming pools, tennis courts, gymnastic halls and boxing rings. Construction work of recreation installations, e.g. golf courses, beach installations, mountain refuges, marinas for pleasure boats, park grounds and recreational park facilities.
- 5139 51390 For engineering works n.e.c.
- Construction work for engineering works not elsewhere classified, such as mine site construction.
- 514 Assembly and erection of prefabricated constructions
- 5140 51400 Assembly and erection of prefabricated constructions
- Installation on site of complete prefabricated buildings or other constructions, or the assembly and erection of prefabricated sections on sites into buildings or other constructions except erection work of prefabricated steel parts.
- Exclusion: Erection work of prefabricated steel parts for buildings and other structures is classified in subclass 51550 (Steel bending and erection (incl. welding)).
- 515 Special trade construction work
- 5151 51510 Foundation work (incl. pile driving)
- Special trade foundation work and pile driving and related work.
- Exclusions: Excavating, digging and other earthmoving work is classified in subclass 51140.
- Concrete work is classified in subclass 51540.
- Masonry block foundation work is classified in subclass 51560 (Masonry work).
- 5152 51520 Water well drilling
- Special trade construction work involving drilling or digging water wells; installation and repair work of water well pumps and well piping systems.
- Exclusion: Installation and repair work of piping systems within buildings are classified in subclass 51620 (Water plumbing and drain laying work).
- 5153 51530 Roofing and water proofing

- Special trade construction work involving the installation of roofing, guttering and spouting, roof shingling and metal roof work. Roof painting work. Included is other water proofing work for buildings.
- 5154 51540 Concrete work
- Special trade construction work involving concreting, concrete pouring and other concrete work, including portland cement and asphalt, on construction projects.
- Exclusions: Construction work involving the paving of streets, highways and public sidewalks is classified in subclass 51310 (Construction work for highways (except elevated highways), streets, roads, railways and airfield runways).
- Block laying work is classified in subclass 51560 (Masonry work).
- 5155 51550 Steel bending and erection (incl. welding)
- Special trade construction work involving steel bending, construction work on steel frameworks, erection work from purchased or self-manufactured structural steel components for buildings or other structures such as bridges, overhead cranes or electricity transmission towers, and steel reinforcing work. Welding work is also included.
- 5156 51560 Masonry work
- Special trade construction work involving bricklaying, block laying, stone setting and other masonry work.
- Exclusions: Concrete work is classified in subclass 51540.
- Interior fitting decoration work is classified in subclass 51770.
- 5159 51590 Other special trade construction work
- Other special trade construction work not elsewhere classified, e.g./grave excavation, house moving.
- 516 Installation work
- 5161 51610 Heating, ventilation and air conditioning work
- Special trade construction work involving electric or non-electric heating, ventilation, refrigeration or air conditioning equipment. Duct work and other related sheet-metal work performed as an integral part of such work is included.
- Exclusion: Electric heating appliance installation work is classified in subclass 51649 (Other electrical construction work).
- 5162 51620 Water plumbing and drain laying work
- Special trade construction work involving primary hot and cold water piping systems (i.e. plumbing), including sprinkler installation, draining (except sewerage or stormwater drains construction work) and septic tank installation. Plumbing work arising from the installation of appliances is included.
- Exclusions: Sewerage or stormwater drains construction work is classified in subclass 51330 (General construction work for waterways, harbours, dams and other waterworks).
- Installation work of space heating is classified in subclass 51610 (Heating, ventilation and air conditioning work).
- 5163 51630 Gas fitting construction work
- Special trade construction work involving natural gas fitting and dry heating systems, except electric heating and duct work.
- Exclusion: Space heating, ventilating and air conditioning work is classified in subclass 51610, whether or not for use with gas.
- 5164 Electrical work
- 51641 Electrical wiring and fitting work
- Special trade construction work involving the installation of the basic electrical wiring network or of fittings in

buildings or other construction projects.

Exclusion: Insulation work of electrical wiring from water piping is classified in subclass 51650 (Insulation work).

51642 Fire alarm construction work

Special trade construction work of fire alarm, fire fighting and fire escape equipment.

Exclusions: Sprinkler installation work is classified in subclass 51620 (Water plumbing and drain-laying work).

Fireproofing work is classified in subclass 51650 (Insulation work (electrical wiring, water, heat, sound)).

51643 Burglar alarm system construction work

Special trade construction work of burglar alarm systems at the construction site.

51644 Residential antenna construction work

Special trade construction work of residential antennas and aerials. Installation work of lightning conductors is included.

51649 Other electrical construction work

Other special trade electrical construction work, not elsewhere classified, e.g. highway lighting and electrical signal construction work and sound equipment, electrical heating or telecommunications equipment installation work. Electrical work arising from the installation of appliances is included.

5165 51650 Insulation work (electrical wiring, water, heat, sound)

Special trade construction work insulating electrical wiring from water piping, and of water, heat or sound, including weather-proofing insulating materials for exterior wall cavities and thermal insulation work to hot and chilled water pipes, boilers and duct runs. Fireproofing work is included.

Exclusion: Water proofing work to roofs is classified in subclass 51530 (Roofing and water proofing).

5166 51660 Fencing and railing construction work

Special trade construction work of fences, railings and similar enclosures. The fences may be of different materials (wire, wood, steel, fibre glass) and may be used at various sites (courts, playgrounds, residential properties or industrial premises).

5169 Other installation work

51691 Lift and escalator construction work

Special trade construction work of lifts and escalators and moving sidewalks. Also included is fire escape equipment construction work (e.g. of staircases).

51699 Other installation work n.e.c.

Other special trade construction work, not elsewhere classified, involving goods not regarded as part of the basic building structure (e.g. installation work of blinds and awnings).

517 Building completion and finishing work

5171 51710 Glazing work and window glass installation work

Special trade construction work of glass, glass cladding, mirrors and other glass products; close-in work such as window glass installation work.

5172 51720 Plastering work

Special trade construction work of interior and exterior plaster or stucco and of lathing materials. Dry wall work involving the installation of wallboard generally of gypsum.

5173 51730 Painting work

Special trade painting and related construction work on building interiors and exteriors, and painting work of

heavy (engineering) structures, including road surface and parking lot marking work.

Exclusion: Roof painting work is classified in subclass 51530 (Roofing and water proofing).

5174 51740 Floor and wall tiling work

Special trade construction work of laying or setting ceramic, concrete or cut stone wall or floor tiles.

5175 51750 Other floor laying, wall covering and wall papering work

Special trade construction work of carpeting, linoleum, asphalt tile, resilient flooring and parquet and other hardwood flooring.

Paperhanging work of wallpaper. Related finishing work is included.

Exclusions: Installation work of concrete floors (except tile) is classified in subclass 51540 (Concrete work).

Installation work of stone and ceramic floor tiles is classified in subclass 51740 (Floor and wall-tiling work).

5176 51760 Wood and metal joinery and carpentry work

Special trade construction work involving carpentry work, the fixing of wooden formwork on construction projects and the building and installation of cabinets at the construction site.

5177 51770 Interior fitting decoration work

Special trade construction work of poured-in-place terrazzo works and interior marble, granite or slate work.

Exclusions: Exterior decoration work is classified in subclass 51560 (Masonry work).

Installation work of tiles is classified in subclass 51740 (Floor and wall-tiling work).

5178 51780 Ornamentation fitting work

Special trade construction work of standard or custom fabricated sheet metal components, decorative iron or steel work, and ornamental or architectural metal work. Such work may also be for functional purposes, e.g./sheet metal heating or air-conditioning duct work.

Exclusion: Installation work of sheet metal roofing is classified in subclass 51530 (Roofing and water proofing).

5179 51790 Other building completion and finishing work

Other special trade building completion and finishing work, e.g./acoustical work involving the application of acoustical panels, tiles and other materials to interior walls and ceilings, and steam or sand cleaning work of building exteriors.

518 Renting services related to equipment for construction or demolition of buildings or civil engineering works, with operator

5180 51800 Renting services related to equipment for construction or demolition of buildings or civil engineering works, with operator

Leasing or rental services concerning construction or demolition equipment with operator and operational services provided by the operator.

Exclusion: Leasing or rental services concerning construction machinery and equipment without operator is classified in subclass 83107.

DIVISION 52 CONSTRUCTIONS

Residential buildings, non-residential buildings and civil engineering works completed or work-in-progress during the inquiry period.

Products classified here are non-transportable goods or, in the SNA terminology, non-financial, fixed tangible assets, and their production may constitute fixed capital formation.

521 Buildings

- 5211 Residential buildings
- 52111 One- and two-dwelling buildings
Residential buildings with one or two dwellings.
- 52119 Other residential buildings
Residential buildings with three or more dwellings.
- 5212 Non-residential buildings
- 52121 Warehouses and industrial buildings
Buildings used to house warehousing activities and the production and assembly activities of industrial establishments, e.g./factories, plants, workshops.
Exclusion: Non-residential farm buildings are classified in subclass 52129 (Other buildings).
- 52122 Commercial buildings
Commercial buildings, including office buildings, bank buildings, buildings used primarily in wholesale and retail trades, e.g. shops, air, rail or road transport terminals, parking garages and petrol and service stations.
- 52123 Buildings for public entertainment
Buildings for public entertainment, e.g. theatres, concert halls, motion-picture theatres, dancehalls and nightclubs.
Exclusions: Museums, art galleries, libraries and similar buildings are classified in subclass 52125 (Educational buildings).
Constructions for sport and recreation are classified in class 5227.
- 52124 Hotel, restaurant and similar buildings
Hotels, restaurants and other buildings used in providing short-term lodging, food and beverages.
- 52125 Educational buildings
Buildings used directly in instructional activities, e.g. schools, universities, museums, art galleries, libraries.
- 52126 Health buildings
Buildings used to provide hospital and institutional care, e.g. hospitals, infirmaries, sanatoria, nursing homes.
- 52129 Other buildings
Buildings, not elsewhere classified, e.g./religious buildings, community buildings, non-residential farm buildings.
Exclusion: Constructions for sport and recreation are classified in class 5227.
- 522 Civil engineering works
- 5221 Highways (except elevated highways), streets, roads, railways, airfield runways
- 52211 Highways (except elevated highways), streets, roads
Highways (except elevated highways), streets, roads and other vehicular and pedestrian ways. Guard-rails and surfaced parking areas, driveways, vehicular or pedestrian underpasses and overpasses, and bicycle paths.
Exclusion: Elevated highways and highway tunnels are classified in subclass 52222 and 52223, respectively.
- 52212 Railways
Railway road-beds for long-line and commuter railways, street tramways, and underground or elevated urban rapid-transit systems. Railway electrification structures are included.

- Exclusion: Other subway constructions are classified in subclass 52224 (Subways).
- 52213 Airfield runways
- Airfield runways, including taxi-ways and related airport structures other than buildings.
- 5222 Bridges, elevated highways, tunnels and subways
- 52221 Bridges
- Bridges and viaducts of metal, concrete or other materials, for all types of land transport and for pedestrians.
- 52222 Elevated highways
- Elevated highways for motor vehicle traffic.
- 52223 Tunnels
- Highway and railway tunnels (except for underground railways) and tunnel construction related works.
- Exclusions: Vehicular and pedestrian underpasses are classified in subclass 52211 (Highways (except elevated highways), streets, roads, railways, airfield runways).
- Underground railway tunnels are classified in subclass 52224 (Subways).
- Tunnels associated with mining operations are classified in subclass 52261 (Mining constructions).
- 52224 Subways
- Tunnel constructions and other underground constructions related to underground railway traffic.
- 5223 Waterways, harbours, dams and other waterworks
- 52231 Aqueducts and other water supply conduits, except pipelines
- Aqueducts, water conduits and similar waterways designed to convey water for the purpose of water supply, except pipelines.
- Exclusions: Waterworks for irrigation or flood control are classified in subclass 52234.
- Long distance pipelines and local pipelines are classified in subclass 52241 and 52250, respectively.
- 52232 Harbours, rivers, canals, and related facilities
- Harbour bottoms and harbour channels, breakwaters, piers, wharfs and similar structures, and riverworks and canal constructions for water transport traffic.
- 52233 Dams
- Dams and similar water-retaining structures and embankments for coastal and other waterside areas.
- 52234 Irrigation and flood control waterworks
- Irrigation and flood control waterworks.
- Exclusion: Waterways for the purpose of water supply are classified in subclass 52231 (Aqueducts and other water supply conduits, except pipelines).
- 5224 Long distance pipelines, communication and power lines (cables)
- 52241 Long distance pipelines
- Long distance overland or submarine pipelines for the conveyance of petroleum products, gas, water or other products.
- Exclusion: Urban gas or water distribution systems through mains are classified in subclass 52250 (Local pipelines and cables; ancillary works).
- 52242 Communication lines (television, radio, telegraph, telephone and other transmission lines)

Long distance overland or submarine telecommunication transmission lines, i.e. television, radio, telegraph, telephone and other transmission lines.

52243 Power lines (cables)

Long distance high-tension electric power transmission lines (cables).

Exclusion: Low-tension electric power distribution lines are classified in subclass 52250 (Local pipelines and cables; ancillary works).

5225 52250 Local pipelines and cables; ancillary works

Local gas pipelines and water and sewer mains and local power and communication transmission lines (cables).

Ancillary works such as transmission towers including antennas and transformer stations and substations for distribution within local boundaries. Local public utility systems, not elsewhere classified.

5226 Constructions for mining and manufacture

52261 Mining constructions

Mining and related facilities, such as mine loading and discharging stations, winding-shafts and towers, tunnels and drifts associated with mining operations.

52262 Power plant constructions

Heavy electrical generating plants and equipment including plants and equipment for nuclear-powered generating stations.

52263 Chemical and related facilities

Chemical and related plant facilities, e.g. blast furnaces and coke ovens, for manufacture of basic chemicals, compounds, pharmaceuticals and other chemicals.

Exclusion: Industrial buildings that are not specialized to the manufacture of particular products are classified in subclass 52121 (Warehouses and industrial buildings).

52269 Other constructions for manufacture

Specialized facilities for manufacture, not elsewhere classified, e.g. iron foundries.

Exclusion: Industrial buildings that are not specialized to the manufacture of particular products are classified in subclass 52121 (Warehouses and industrial buildings).

5227 Constructions for sport and recreation

52271 Stadia, sports grounds

Stadia and other grounds for sports generally played in the open air such as football, baseball, rugby, track and field, car or bicycle races and horse-races. Stadia generally provide substantial seating and/or standing accommodation for spectators.

52279 Other sport and recreation installations (e.g. swimming pools, tennis courts, golf courses)

Other sport and recreation installations. The sport installations classified here are mostly for indoor sports and provide limited seating or other accommodation for spectators, e.g. basketball courts, ice hockey rinks, swimming pools, tennis courts, gymnastic halls, boxing rings, skating rinks.

Recreation installations, e.g. golf courses, beach installations, mountain refuges, marinas for pleasure boats, park grounds and recreational park facilities.

5229 52290 Other civil engineering works

Other civil engineering works, not elsewhere classified.

DIVISION 53 LAND

Agricultural and wooded land, built-up land, open land, and other land. Use of land information at the international level

for comparative descriptions and analyses of national land use patterns.

531 Agricultural land, forest and other wooded land

5310 53100 Agricultural land, forest and other wooded land

Land on which agricultural, horticultural or forestry activity is carried on for commercial or subsistence purposes, including nurseries, plantations, orchards and vineyards, meadows and pastures; fallow agricultural land, forests and other wooded land. Land forming a part of a farming enterprise including scattered farm buildings, but not access roads.

532 Built-up and related land

5320 53200 Built-up and related land

Land under houses, roads, mines and quarries and any other facilities, including their auxiliary spaces, deliberately installed for the pursuit of human activities, except recreational purposes. - 7524 Programme transmission services
- 75241 Television broadcast transmission services
- Network services necessary for the transmission of television signals, independently of the type of technology (network) employed. This subclass does not include satellite-to-cable services where the provider sells T.V. signals via satellite to cable companies (as opposed to selling use of satellite facilities) nor does it include DTH (direct-to-home) satellite services where the provider sells television programme packages directly to households located in remote areas.
- 75242 Radio broadcast transmission services
- Network services necessary for the transmission of audio signals such as radio broadcasting, wired music and loudspeaker service.
- 7525 75250 Interconnection services
- Network services by one carrier to another when a communication originating in a carrier's territory must travel through another carrier's network to reach its destination.
- 7526 75260 Integrated telecommunications services
- Private point-to-point or multipoint network services which enable the users to simultaneously or alternatively transmit voice, data and/or image. This type of service offers high bandwidth capacity and flexible, customer controlled network reconfiguration to accommodate changing traffic patterns.
- 7529 Other telecommunications services
- 75291 Paging services
- The summoning of a person to the telephone through the use of an electronic pager. This subclass includes tone, voice and digital display paging services.
- 75292 Teleconferencing services
- Network and related services necessary to hold a one-way or two-way fully interactive video conference.
- 75299 Other telecommunications services n.e.c.
- Telecommunications services, not elsewhere classified. This class includes mobile maritime and air-to-ground communications services.
- 753 Radio and television cable services
- 7530 75300 Radio and television cable services
- Radio and television programming packages via cable. This subclass includes both basic and "pay-TV" services.
- 754 Telecommunications related services
- 7541 75410 Equipment rental services
- Telecommunication terminal equipment leasing or rental services (generally for a flat monthly fee).
- 7542 75420 Equipment sales services
- The retail or wholesale sales of telecommunication terminal equipment.

- 7543 75430 Connection services
The provision of access to telecommunication network services by connecting the customer's premises to the carrier's facilities.
- 7544 75440 Consulting services
The provision of advice and assistance to businesses and/or institutions on matters related to telecommunications and telematics.
- 7545 75450 Communications equipment maintenance services
The provision of maintenance services for communications and communications related products on a fee or contract basis. Equipment maintained includes modems, multiplexers, earth stations, microcomputers, peripherals, telex terminals, telephones etc.
- 7549 75490 Other telecommunications services n.e.c.
The provision of telecommunications related services not elsewhere classified such as operator services furnished to other carriers, billing and collection services for customer sponsored services etc.

DIVISION 84 COMPUTER AND RELATED SERVICES

841 Consultancy services related to the installation of computer hardware

8410 84100 Consultancy services related to the installation of computer hardware

Assistance services to the clients in the installation of computer hardware (i.e. physical equipment) and computer networks.

842 Software implementation services

All services involving consultancy services on, development and implementation of software. The term "software" may be defined as the sets of instructions required to make computers work and communicate. A number of different programmes may be developed for specific applications (application software), and the customer may have a choice of using ready-made programmes off the shelf (packaged software), developing specific programmes for particular requirements (customized software) or using a combination of the two.

8421 84210 Systems and software consulting services

Services of a general nature prior to the development of data processing systems and applications. It might be management services, project planning services, etc.

8422 84220 Systems analysis services

Analysis services include analysis of the clients' needs, defining functional specification, and setting up the team. Also involved are project management, technical coordination and integration and definition of the systems architecture.

8423 84230 Systems design services

Design services include technical solutions, with respect to methodology, quality-assurance, choice of equipment software packages or new technologies, etc.

8424 84240 Programming services

Programming services include the implementation phase, i.e. writing and debugging programmes, conducting

tests, and editing documentation.

8425 84250 Systems maintenance services

Maintenance services include consulting and technical assistance services of software products in use, rewriting or changing existing programmes or systems, and maintaining up-to-date software documentation and manuals. Also included are specialist work, e.g. conversions.

843 Data processing services

8431 84310 Input preparation services

Data recording services such as key punching, optical scanning or other methods for data entry.

8432 84320 Data-processing and tabulation services

Services such as data processing and tabulation services, computer calculating services, and rental services of computer time.

8433 84330 Time-sharing services

This seems to be the same type of services as 84320. Computer time only is bought; if it is bought from the customer's premises, telecommunications services are also bought. Data processing or tabulation services may also be bought from a service bureau. In both cases the services might be time sharing processed. Thus, there is no clear distinction between 84320 and 84330.

8439 84390 Other data processing services

Services which manage the full operations of a customer's facilities under contract: computer-room environmental quality control services; management services of in-place computer equipment combinations; and management services of computer work flows and distributions.

844 Database services

8440 84400 Database services

All services provided from primarily structured databases through a communication network.

Exclusions: Data and message transmission services (e.g. network operation services, value-added network services) are classified in class 7523 (Data and message transmission services).

Documentation services consisting in information retrieval from databases are classified in subclass 96311 (Library services).

845 Maintenance and repair services of office machinery and equipment including computers

8450 84500 Maintenance and repair services of office machinery and equipment including computers

Repair and maintenance services of office machinery, computers and related equipment.

849 Other computer services

8491 84910 Data preparation services

Data preparation services for clients not involving data processing services.

8499 84990 Other computer services n.e.c.

Other computer related services, not elsewhere classified, e.g. training services for staff of clients, and other professional computer services.

DIVISION 85 RESEARCH AND DEVELOPMENT SERVICES

Research and development services consisting in scientific progress achieved in the various fields of natural or social sciences in the three areas of R&D, i.e. basic research, applied research and experimental development. R&D services are subdivided into groups, classes and subclasses according to the sciences to which the R&D services relate.

851 8510 Research and experimental development services on natural sciences and engineering

85101 Research and experimental development services on physical sciences

Research and experimental development services on physical sciences, including research and experimental development services on heat, light, electromagnetism, astronomy, etc.

85102 Research and experimental development services on chemistry and biology

Research and experimental development services on chemistry and biology, including research and experimental development services on catalyzer, fermentation, physiology and ecology of animals and plants, microorganisms, etc.

85103 Research and experimental development services on engineering and technology

Research and experimental development services on engineering and technology, including research and experimental development services on applied science and technology for casting, metal, machinery, electricity, communications, vessels, aircraft, civil engineering, construction, information, etc.

85104 Research and experimental development services on agricultural sciences

Research and experimental development services on agricultural sciences, including research and experimental development services on agricultural techniques, fruit culture, forestry, stockbreeding, fisheries, etc.

85105 Research and experimental development services on medical sciences and pharmacy

Research and experimental development services on medical sciences and pharmacy, including research and experimental development services on treatment of diseases, preventive hygiene, pharmacy, etc.

85109 Research and experimental development services on other natural sciences

Research and experimental development services on other natural sciences.

852 8520 Research and experimental development services on social sciences and humanities

85201 Research and experimental development services on cultural sciences, sociology and psychology

Research and experimental development services on cultural sciences, sociology and psychology, including research and experimental development on literature, philosophy, history, welfare, educational psychology, etc.

85202 Research and experimental development services on economics

Research and experimental development services on economics, including research and experimental development services on theories of economics, business management, finance, statistics, etc.

85203 Research and experimental development services on law

Research and experimental development services on law, including research and experimental development services on public law, civil law, etc.

85204 Research and experimental development services on linguistics and languages

Research and experimental development services on linguistics and languages, including research and experimental development services on linguistic structure and distribution, foreign languages, etc.

85209 Research and experimental development services on other social sciences and humanities

Research and experimental development services on other social sciences and humanities.

853 Interdisciplinary research and experimental development services

8530 85300 Interdisciplinary research and experimental development services

Interdisciplinary research and experimental development services on interdisciplinary sciences, including research and experimental development services on environmental sciences, educational engineering, human geography, etc.

DIVISION 86 LEGAL, ACCOUNTING, AUDITING AND BOOKKEEPING SERVICES; TAXATION SERVICES; MARKET RESEARCH AND PUBLIC OPINION POLLING SERVICES; MANAGEMENT AND CONSULTING SERVICES; ARCHITECTURAL, ENGINEERING AND OTHER TECHNICAL SERVICES

861 Legal services

8611 Legal advisory and representation services in the different fields of law

86111 Legal advisory and representation services concerning criminal law

Legal advisory and representation services during the litigation process, and drafting services of legal documentation in relation to criminal law. Generally, this implies the defence of a client in front of a judicial body in a case of criminal offence. However, it can also consist of acting as a prosecutor in a case of criminal offence when private legal practitioners are hired on a fee basis by the government. Included are both the pleading of a case in court and out-of-court legal work. The latter comprises research and other work for the preparation of a criminal case (e.g. researching legal documentation, interviewing witnesses, reviewing police and other reports), and the execution of post-litigation work, in relation to criminal law.

86119 Legal advisory and representation services in judicial procedures concerning other fields of law

Legal advisory and representation services during the litigation process, and drafting services of legal documentation in relation to law other than criminal law. Representation services generally consist of either acting as a prosecutor on behalf of the client, or defending the client from a prosecution. Included are both the pleading of a case in court, and out-of-court legal work. The latter comprises research and other work for the preparation of a case (e.g. researching legal documentation, interviewing witnesses, reviewing police and other reports), and the execution of post-litigation work, in relation to law other than criminal law.

8612 86120 Legal advisory and representation services in statutory procedures of quasi-judicial tribunals, boards, etc.

Legal advisory and representation services during the litigation process, and drafting services of legal documentation in relation to statutory procedures. Generally, this implies the representation of a client in front of a statutory body (e.g. an administrative tribunal). Included are both the pleading of a case in front of authorized bodies other than judicial courts, and the related legal work. The latter comprises research and other work for the preparation of a non-judicial case (e.g. researching legal documentation, interviewing witnesses, reviewing reports), and the execution of post-litigation work.

8613 86130 Legal documentation and certification services

Preparation, drawing up and certification services of legal documents. The services generally comprise the provision of a number of related legal services including the provision of advice and the execution of various tasks necessary for the drawing up or certification of documents. Included are the drawing up of wills, marriage contracts, commercial contracts, business charters, etc.

8619 86190 Other legal advisory and information services

Advisory services to clients related to their legal rights and obligations and providing information on legal matters not elsewhere classified. Services such as escrow services and estate settlement services are included.

862 Accounting, auditing and bookkeeping services

8621 Accounting and auditing services

86211 Financial auditing services

Examination services of the accounting records and other supporting evidence of an organization for the purpose of expressing an opinion as to whether financial statements of the organization present fairly its position as at a given date and the results of its operations for the period ended on that date in accordance with generally accepted accounting principles.

86212 Accounting review services

Reviewing services of annual and interim financial statements and other accounting information. The scope of a review is less than that of an audit and therefore the level of assurance provided is lower.

86213 Compilation of financial statements services

Compilation services of financial statements from information provided by the client. No assurances regarding the accuracy of the resulting statements are provided. Preparation services of business tax returns, when provided as a bundle with the preparation of financial statements for a single fee, are classified here.

Exclusion: Business tax preparation services, when provided as separate services, are classified in subclass 86302 (Business tax preparation and review services).

- 86219 Other accounting services
- Other accounting services such as attestations, valuations, preparation services of pro forma statements, etc.
- 8622 86220 Bookkeeping services, except tax returns
- Bookkeeping services consisting in classifying and recording business transactions in terms of money or some unit of measurement in the books of account.
- Exclusion: Bookkeeping services related to tax returns are classified in subclass 86302 (Business tax preparation and review services).
- 863 8630 Taxation services
- 86301 Business tax planning and consulting services
- Advisory services to enterprises on how to arrange their affairs, with a view to minimizing the impact of income taxation on their profits by taking advantage of all allowances and benefits that the law provides.
- Exclusion: Similar advisory services but including preparation or review services of various returns and reports for the client are classified in subclass 86302 (Business tax preparation and review services).
- 86302 Business tax preparation and review services
- Services consisting in preparing or reviewing, for enterprises, various returns and reports required for compliance with the income tax laws and regulations and defending them if contested by the tax authorities. This may also include tax planning and control.
- Exclusion: Advisory services on tax planning not including preparation or review services of returns and reports are classified in subclass/86301 (Business tax planning and consulting services).
- 86303 Individual tax preparation and planning services
- Services consisting in advising individuals on the means to minimize the impact of income tax on their revenues by taking advantage of all allowances and benefits that the law provides and/or preparing the returns and reports required for compliance with tax laws and regulations.
- 86309 Other tax related services
- Services consisting in assisting enterprises in tax planning and control other than income tax and preparing all documentation required by law.
- 864 8640 Market research and public opinion polling services
- 86401 Market research services
- Investigation services designed to secure information on the prospects and performance of an organization's products in the market. Included here are market analysis (size and other characteristics of a market) and analysis of consumer attitudes and preferences, which may utilize personal interviews, telephone and mail surveys, historical data, etc. Economic and social intelligence services not in connection with merchandised products, such as industry analysis, econometric modelling, demographic analysis, etc., are also included.
- Exclusion: Public opinion polling services are classified in subclass/86402.
- 86402 Public opinion polling services
- Investigation services designed to secure information on public opinions regarding social, economic, political and other issues. Public opinion polling is typically done by telephone interviews but may also utilize personal interviews and mail surveys.
- Exclusion: Similar investigation services designed to gather intelligence on consumer attitudes and preferences are classified in subclass 86401 (Market research services).
- 865 8650 Management consulting services
- 86501 General management consulting services
- Advisory, guidance and operational assistance services concerning business policy and strategy and the overall

planning, structuring and control of an organization. More specifically, general management consulting assignments may deal with one or a combination of the following: policy formulation, determination of the organizational structure (decision-making system) that will most effectively meet the objectives of the organization, legal organization, strategic business plans, defining a management information system, development of management reports and controls, business turnaround plans, management audits, development of profit improvement programmes and other matters which are of particular interest to the higher management of an organization.

86502 Financial management consulting services (except business tax)

Advisory, guidance and operational assistance services concerning decision areas which are financial in nature, such as working capital and liquidity management, determination of an appropriate capital structure, analysis of capital investment proposals, development of accounting systems and budgetary controls, business valuations prior to mergers and/or acquisitions, etc., but excluding advisory services on short-term portfolio management which are normally offered by financial intermediaries.

86503 Marketing management consulting services

Advisory, guidance and operational assistance services concerning the marketing strategy and marketing operation of an organization. Marketing consulting assignments may deal with one or a combination of the following: analysis and formulation of a marketing strategy, formulation of customer service and pricing policies, sales management and staff training, organization of distribution channels (sell to wholesalers or directly to retailers, direct mail, franchise, etc.), organization of the distribution process, package design and other matters related to the marketing strategy and operations of an organization.

86504 Human resources management consulting services

Advisory, guidance and operational assistance services concerning the human resources management of an organization. Human resources consulting assignments may deal with one or a combination of the following: audit of the personnel function, development of a human resource policy, human resource planning, recruitment procedures, motivation and remuneration strategies, human resource development, labour-management relations, absenteeism control, performance appraisal and other matters related to the personnel management function of an organization.

86505 Production management consulting services

Advisory, guidance and operational assistance services concerning methods for improving productivity, reducing production costs and improving the quality of production. Production consulting assignments may deal with one or a combination of the following: effective utilization of materials in the production process, inventory management and control, quality control standards, time and motion studies, job and work methods, performance standards, safety standards, office management, planning and design and other matters related to production management, but excluding advisory services and design for plant layout and industrial processes which are normally offered by consulting engineering establishments.

86506 Public relations services

Advisory, guidance and operational assistance services concerning methods to improve the image and relations of an organization or individual with the general public, government, voters, shareholders and others.

86509 Other management consulting services

Advisory, guidance and operational assistance services concerning other matters. These services include industrial development consulting services, tourism development consulting services, etc.

866 8660 Services related to management consulting

86601 Project management services other than for construction

Coordination and supervision services of resources in preparing, running and completing a project on behalf of the client. Project management services can involve budgeting, accounting and cost control, procurement, planning of timescales and other operating conditions, coordination of subcontractors' work, inspection and quality control, etc. These services consist only of management services; operating staff services are excluded.

Exclusions: Construction project management services are classified in class 8671 (Architectural services), 8672 (Engineering services) and, for turnkey projects, 8673 (Integrated engineering services).

86602 Arbitration and conciliation services

Assistance services through arbitration or mediation for the settlement of a dispute between labour and

management, between businesses or between individuals.

Exclusions: Representation services on behalf of one of the parties in the dispute and consulting services in the field of labour relations are classified in subclass 86190 (Other legal advisory and information services), 95110 (Services furnished by business and employers organizations) and 95200 (Services furnished by trade unions), respectively.

86609 Other management services n.e.c.

Management services, not elsewhere classified.

867 Architectural, engineering and other technical services

8671 Architectural services

86711 Advisory and pre-design architectural services

Assistance, advisory and recommendation services concerning architectural and related matters. Included here are services as undertaking preliminary studies addressing issues such as site philosophy, intent of development, climatic and environmental concerns, occupancy requirements, cost constraints, site selection analysis, design and construction scheduling and any other issues affecting the nature of the design and construction of a project. The provision of these services is not necessarily related to a new construction project. For example, it may consist of advice concerning the means of carrying out maintenance, renovation, restoration or recycling of buildings, or appraisals of the value and quality of buildings or of advice on any other architectural matter.

86712 Architectural design services

Architectural design services for buildings and other structures. Design services may consist of one or a combination of the following: schematic design services, which consist of determining, with the client, the essential character of the project, defining intent, space requirements, budget limitations and time scheduling; and of preparing sketches including floor plans, site plans and exterior views; design development services, which consist of a more precise illustration of the design concept in terms of siting plan, form, material to be used, structural, mechanical and electrical systems and probable construction costs; final design services, which consist of drawings and written specifications sufficiently detailed for tender submission and construction, and of expert advice to the client at the time of calling for and accepting tenders.

86713 Contract administration services

Advisory and technical assistance services to the client during the construction phase to ensure that the structure is being erected in conformity with the final drawings and specifications. This involves services provided both in offices and the field, such as construction inspection, preparation of progress reports, issuance of certificates for payments to the contractor, guidance to the client and the contractor in the interpretation of contract documents and any other advice on technical questions that may develop during construction.

86714 Combined architectural design and contract administration services

Combinations of architectural services utilized on most projects including schematic design, design development, final design and contract administration services. This may include post construction services which consist of the assessment of deficiencies in construction and instructions regarding corrective measures to be taken during the 12-month period following the completion of the construction.

86719 Other architectural services

All other services requiring the expertise of architects, such as the preparation of promotional material and presentations, preparation of as-built drawings, constant site representation during the construction phase, provision of operating manuals, etc.

8672 Engineering services

86721 Advisory and consultative engineering services

Assistance, advisory and recommendation services concerning engineering matters. Included here are the undertaking of preparatory technical feasibility studies and project impact studies. Examples are: study of the impact of topography and geology on the design, construction and cost of a road, pipeline or other transportation infrastructure; study of the quality or suitability of materials intended for use in a construction project and the impact on design, construction and cost of using different materials; study of the environmental impact of a project; study of the efficiency gains in production as a result of alternative process, technology or plant layout. The provision of these services is not necessarily related to a construction project. It may consist, for example, of the appraisal of the structural, mechanical and electrical installations of buildings, of expert testimony in

litigation cases, of assistance to government bodies in drafting laws, etc.

86722 Engineering design services for the construction of foundations and building structures

Structural engineering design services for the load-bearing framework of residential and commercial, industrial and institutional buildings. Design services consist of one or a combination of the following: preliminary plans, specifications and cost estimates to define the engineering design concept; final plans, specifications and cost estimates, including working drawings, specifications regarding materials to be used, method of installation, time limitations and other specifications necessary for tender submission and construction and expert advice to the client at the time of calling for and accepting tenders; services during the construction phase.

Exclusion: Engineering services for buildings if they are an integral part of the engineering design service for a civil work or production plant or facility.

86723 Engineering design services for mechanical and electrical installations for buildings

Mechanical and electrical engineering design services for the power system, lighting system, fire alarm system, communication system and other electrical installations for all types of buildings and/or the heating, ventilating, air conditioning, refrigeration and other mechanical installations for all types of buildings. Design services consist of one or a combination of the following: preliminary plans, specifications and cost estimates to define the engineering design concept; final plans, specifications and cost estimates, including working drawings, specifications regarding materials to be used, method of installation, time limitations and other specifications necessary for tender submission and construction and expert advice to the client at the time of calling for and accepting tenders; services during the construction phase.

86724 Engineering design services for the construction of civil engineering works

Engineering design services for the construction of civil engineering works, such as bridges and viaducts, dams, catchment basins, retaining walls, irrigation systems, flood control works, tunnels, highways and streets including interchanges and related works, locks, canals, wharves and harbours works, water supply and sanitation works such as water distribution systems, water, sewage, industrial and solid waste treatment plants and other civil engineering projects. Design services consist of one or a combination of the following: preliminary plans, specifications and cost estimates to define the engineering design concept; final plans, specifications and cost estimates, including working drawings, specifications regarding materials to be used, method of installation, time limitations and other specifications necessary for tender submission and construction and expert advice to the client at the time of calling for and accepting tenders; services during the construction phase. Included are engineering design services for buildings if they are an integral part of the engineering design for a civil engineering work.

86725 Engineering design services for industrial processes and production

Engineering design services for production processes, procedures and facilities. Included here are design services as they relate to methods of cutting, handling and transporting logs and logging site layout; mine development layout and underground construction, the complete civil, mechanical and electrical mine surface plant installations including hoists, compressors, pumping stations, crushers, conveyors and ore and waste-handling systems; oil and gas recovery procedures, the construction, installation and/or maintenance of drilling equipment, pumping stations, treating and storage facilities and other oil field facilities; materials flows, equipment layout, material handling systems, processes and process control (which may integrate computer technology) for manufacturing plants; special machinery, equipment and instrumentation systems; any other design services for production procedures and facilities. Design services consist of one or a combination of the following: preliminary plans, specifications and cost estimates to define the engineering design concept; final plans, specifications and cost estimates, including working drawings, specifications regarding materials to be used, method of construction and/or installation, time limitations and other specifications necessary for tender submission and construction and expert advice to the client at the time of calling for and accepting tenders; services during the installation phase. Included are engineering design services for buildings if they are an integral part of the engineering design service for a production plant or facility.

86726 Engineering design services n.e.c.

Other specialty engineering design services. Included here are acoustical and vibration engineering designs, traffic control systems designs, prototype development and detailed designs for new products and any other specialty engineering design services.

Exclusion: The aesthetic design of products and the complete design of products which do not require complex engineering (e.g. furniture) are classified in subclass 87907 (Specialty design services).

86727 Other engineering services during the construction and installation phase

Advisory and technical assistance services to the client during construction to ensure that construction work is in conformity with the final design. This involves services provided both in offices and in the field, such as the review of shop drawings, periodic visits to the site to assess progress and quality of the work, guiding the client and the contractor in the interpretation of contract documents and any other advice on technical questions that may develop during construction.

86729 Other engineering services

Engineering services not elsewhere classified. Included here are geotechnical engineering services providing engineers and architects with necessary subsurface information to design various projects; groundwater engineering services including groundwater resources assessment, contamination studies and quality management; corrosion engineering services including inspection, detection and corrosion control programmes; failure investigations and other services requiring the expertise of engineers.

8673 Integrated engineering services

86731 Integrated engineering services for transportation infrastructure turnkey projects

Fully integrated engineering services for the construction of transportation infrastructure turnkey projects. Services included here are planning and pre-investment studies, preliminary and final design, cost estimation, construction scheduling, inspection and acceptance of contract work as well as technical services, such as the selection and training of personnel and the provision of operation and maintenance manuals and any other engineering services provided to the client that form part of an integrated bundle of services for a turnkey project.

86732 Integrated engineering and project management services for water supply and sanitation works turnkey projects

Fully integrated engineering services for the construction of water supply and sanitation works turnkey projects. Services included here are planning and pre-investment studies, preliminary and final design, cost estimation, construction scheduling, inspection and acceptance of contracts as well as technical services, such as the selection and training of personnel and the provision of operation and maintenance manuals and any other engineering services provided to the client that form part of an integrated bundle of services for a turnkey project.

86733 Integrated engineering services for the construction of manufacturing turnkey projects

Fully integrated engineering services for the construction of manufacturing facilities turnkey projects. Services included here are planning and pre-investment studies to address issues such as the integration of operations, site selection, pollution and effluent control and capital requirements; all necessary structural, mechanical and electrical design services; production process engineering design services including detailed process flow diagrams, general site and plant arrangement drawings, plant and equipment specifications; tender specifications; construction scheduling inspection and acceptance of work as well as technical services, such as the selection and training of personnel, the provision of operations and maintenance manuals, start-up assistance and any other engineering services that form part of an integrated bundle of services for a turnkey project.

86739 Integrated engineering services for other turnkey projects

Fully integrated engineering services for other construction works. Services included here are planning and pre-investment studies, preliminary and final design, cost estimates, construction scheduling, inspection and acceptance of contracts as well as technical services, such as the selection and training of personnel and the provision of operation and maintenance manuals and any other engineering services provided to the client that form part of an integrated bundle of services for a turnkey project.

8674 Urban planning and landscape architectural services

86741 Urban planning services

Development services of programme regarding land use, site selection, control and utilization, road systems and servicing of land with a view to creating and maintaining systematic, coordinated urban development.

86742 Landscape architectural services

Plan and design services for the aesthetic landscaping of parks, commercial and residential land, etc. This implies preparing site plans, working drawings, specifications and cost estimates for land development, showing ground contours, vegetation to be planted, and facilities such as walks, fences and parking areas. Also included are inspection services of the work during construction.

8675 Related scientific and technical consulting services

86751 Geological, geophysical and other scientific prospecting services

Geological, geophysical, geochemical and other scientific consulting services as they relate to the location of mineral deposits, oil and gas and groundwater by studying the properties of the earth and rock formations and structures. Included here are the services of analysing the results of subsurface surveys, the study of earth sample and core, and assistance and advice in developing and extracting mineral resources.

86752 Subsurface surveying services

Gathering services of information on subsurface earth formations by different methods, including seismographic, gravimetric, magnetometric and other subsurface surveying methods.

86753 Surface surveying services

Gathering services of information on the shape, position and/or boundaries of a portion of the earth's surface by different methods, including transit, photogrammetric and hydrographic surveying, for the purpose of preparing maps.

86754 Map-making services

Map-making services consisting in the preparation and revision of maps of all kinds (e.g. road, cadastral, topographic, planimetric, hydrographic) using results of survey activities, other maps, and other information sources.

8676 Technical testing and analysis services

86761 Composition and purity testing and analysis services

Testing and analysis services of the chemical and biological properties of materials such as air, water, waste (municipal and industrial), fuels, metal, soil, minerals, food and chemicals. Included are testing and analysis services in related scientific fields such as microbiology, biochemistry, bacteriology, etc. Excluded are medical and dental testing services.

86762 Testing and analysis services of physical properties

Testing and analysis services of physical properties such as strength, ductility, electrical conductivity and radioactivity of materials such as metal, plastics, textiles, woods, glass, concrete and other materials. Included are tests for tension, hardness, impact resistance, fatigue resistance, and high-temperature effects.

86763 Testing and analysis services of integrated mechanical and electrical systems

Testing and analysis services of the mechanical and electrical characteristics of complete machinery, motors, automobiles, tools, appliances, communication equipment and other equipment incorporating mechanical and electrical components. The results of the testing and analysis generally take the form of an assessment of the performance and behavioural characteristics of the object tested. Tests may be performed using models or mock-ups of ships, aircraft, dams, etc.

86764 Technical inspection services

Testing and analysis services of a technical or scientific nature which do not alter or affect the object being tested. Included are radiographic, magnetic, and ultrasonic testing of machine parts and structures conducted in order to identify defects. These tests are often conducted on site. Excluded are inspection services of a non-technical or scientific nature, such as visual inspection of buildings, machines, etc.

86769 Other technical testing and analysis services

All other technical testing and analysis services not elsewhere classified.

DIVISION 87 BUSINESS SERVICES N.E.C.

871 Advertising services

8711 87110 Sale or leasing services of advertising space or time

Services provided in soliciting advertising space or time for newspapers, other periodicals, and television stations.

8712 87120 Planning, creating and placement services of advertising

- Planning, creating and placement services of advertisements to be displayed through the advertising media.
- 8719 87190 Other advertising services
- Other advertising services not elsewhere classified, including outdoor and aerial advertising services and delivery services of samples and other advertising material.
- 872 8720 Placement and supply services of personnel
- 87201 Executive search services
- Services consisting in the search for, selection and referral of executive personnel for employment by others. Included in this category are services provided by senior administrators and managers whose functions generally include planning, organizing, directing and controlling activities of private or public sector businesses through subordinate administrators. The services may be supplied to the potential employer or to the prospective employee and may involve the formulation of job descriptions, the screening and testing of applicants, the investigation of references, and other research.
- 87202 Placement services of office support personnel and other workers
- Services consisting in selecting, referring and placing applicants in employment by others on a permanent or temporary basis, except executive search services. The services may be supplied to the potential employer or to the prospective employee and may involve the formulation of job descriptions, the screening and testing of applicants, the investigation of references, etc. Included are the placement of secretaries, clerks, receptionists, book-keepers, data entry operators, typists, word-processor operators, nurses, models, maids, ship crews, etc.
- 87203 Supply services of office support personnel
- Services consisting in supplying on a fee or contract basis to the clients, whether on a temporary or long-term basis, office support personnel hired by the supplier, who pays their emoluments. Included are the provision of personnel such as secretaries, clerks, receptionists, book-keepers, data entry operators, typists and word-processor operators.
- 87204 Supply services of domestic help personnel
- Services consisting in supplying on a fee or contract basis to the clients, whether on a temporary or long-term basis, domestic help personnel hired by the supplier, who pays their emoluments. Included are the provision of maids, nannies, housekeepers, companions, etc.
- Exclusions: Supply services of specialized domestic services through employees on the payroll of the supplier are classified according to the services rendered, e.g. as cleaning services, class 8740, or lawn maintenance services, subclass 88110 (Services incidental to agriculture).
- 87205 Supply services of other commercial or industrial workers
- Services consisting in supplying on a fee or contract basis to the clients, whether on a temporary or long-term basis, industrial workers hired by the supplier, who pays their emoluments. Included are supply services of construction workers, maintenance workers, drivers, machinists assemblers, metalworking machine operators, labourers, movers, shippers, etc.
- 87206 Supply services of nursing personnel
- Services consisting in supplying on a fee or contract basis to the clients, whether on a temporary or long-term basis, nursing personnel hired by the supplier, who pays their emoluments. Included are supply services of nurses, nursing assistants and other health care aides.
- 87209 Supply services of other personnel
- Supply services of other personnel not elsewhere classified.
- 873 8730 Investigation and security services
- 87301 Investigation services
- Services consisting in investigating cases submitted by the client, relating to crimes, theft, fraud, shoplifting, dishonesty, missing persons, domestic relations and other unlawful or lawful practices. Included are internal and undercover investigation and shoplifting protection services.

87302 Security consultation services

Services consisting in determining client's needs and providing advice and suggestions as to the type of security that is best suited for the client or as to improvements in existing systems.

87303 Alarm monitoring services

Services consisting in monitoring and maintaining security systems devices, such as burglar and fire alarms, by receiving alarm signals, confirming or checking that all systems are properly functioning and dispatching police officers, fire department or other designated parties.

87304 Armoured car services

Services consisting in providing an armoured car to pick up and deliver money, receipts or other valuable items, with hired personnel to directly protect properties while in transit. The services generally imply bank collection and deposit services, securities transfer, etc.

87305 Guard services

Services consisting in providing protective services through hired personnel to ensure safety of people or private, industrial and commercial properties by guarding them against fire, theft, vandalism or illegal entry. Included are patrol and inspection services, security guard services, bodyguard services, watchdog services, parking control and access control services.

87309 Other security services

Security services not elsewhere classified.

874 8740 Building cleaning services

87401 Disinfecting and exterminating services

Services consisting in disinfecting dwellings and other buildings and exterminating insects, rodents and other pests. Included are fumigating services and pest control services.

87402 Window cleaning services

Services consisting in cleaning windows in dwellings and other buildings. Included here are cleaning services of exterior windows using swing stages.

87403 Janitorial services

Services consisting in cleaning and maintaining dwellings and other buildings. Included here are floor cleaning and waxing, interior wall cleaning, furniture polishing and other janitorial and maintenance services.

87409 Other building cleaning services

Building cleaning services not elsewhere classified. Included are furnace and chimney cleaning.

Exclusions: Building exterior cleaning services are classified in subclass 51790 (Other building completion and finishing work).

Lawn maintenance services are classified in subclass 88110 (Services incidental to agriculture).

875 8750 Photographic services

87501 Portrait photography services

Services consisting in photographing persons or other subjects in studios or other locations such as clients' offices or homes. The pictures must represent as faithfully as possible the subject's physical features and personality. Generally included with these services is the development and printing of such pictures according to customer specifications. Included are passport or identification photographs, infant and child portraits, family or military portraits, studio fashion photos, and corporate pictures.

87502 Advertising and related photography services

Services consisting in photographing merchandise, industrial products, fashion clothes and other apparel, machinery, buildings, persons and other subjects for use in public relations, advertising displays or literature, such as annual reports, product brochures, newspaper advertisements, catalogues or food and beverage layouts.

Generally included with these services is the development and printing of such pictures according to customer specifications.

87503 Action photography services

Services consisting in photographing live events, such as weddings, graduations, conventions, receptions, fashion shows, sports and news events, and any other events of current interest. Generally included with these services is the development and printing of such pictures according to customer specifications.

87504 Specialty photography services

Services consisting in photographing persons, objects or scenery using special apparatus and techniques. Generally these services also include the development and printing of such pictures. Examples of such services are aerial photography, underwater photography, medical and biological photography, and photomicrography.

87505 Photography processing services

Services consisting primarily in the development of negatives and the printing of pictures for others according to customer specifications. These services may include enlargement of negatives or slides, black and white processing, colour printing, slide and negative duplicates, reprints, etc. Also included are preparation services of photographic slides.

87506 Motion picture processing services not related to the motion picture and television industries

Services consisting in the development of motion picture films of both amateur photographers and commercial clients.

Exclusion: Processing services of motion pictures in connection with the motion picture and television industries are classified in subclass 96112 (Motion picture or video tape production services).

87507 Restoration, copying and retouching services of photography

Services consisting of old photograph restoration, copying from a picture, retouching, and other special photographic effects.

87509 Other photographic services

Photographic services not elsewhere classified.

876 8760 87600 Packaging services

Services consisting in packaging goods for others on a fee or contract basis, such as food products, pharmaceuticals, household cleaners, toilet preparations and hardware using a variety of automated or manual packaging techniques including blister forming and packaging, shrink or skin wrapping, form filling and sealing, pouch filling, bottling and aerosol packaging. Parcel packing and gift wrapping are also included. This service may also include the labelling or imprinting of the package.

Exclusions: If the services provided consist solely of printing information on packaging materials, it is classified in the appropriate subclass of group 325 or 326, i.e. printed matter or articles of paper or paperboard.

Packing and crating services incidental to transport are classified in division 74 (Supporting and auxiliary transport services).

Package design services are classified in subclass 87907 (Specialty design services).

If the packaging services also include processing of client owned materials into a different product (e.g. mixing water and concentrate to produce soft drinks, cooking fish prior to canning, blending creams and colouring materials into cosmetics), it is classified in the appropriate subclass of group 884 or 885 (Services incidental to manufacturing).

879 8790 Other business services

87901 Credit reporting services

Services consisting in the reporting of credit ratings of persons and businesses. This involves the evaluation of the financial status and credit experience of prospective customers, loan applicants, etc.

87902 Collection agency services

Services consisting in the collection on a fee or contract basis of accounts, cheques, contracts or notes, and remittance of the money to the client. Included are both the collection of regular accounts (e.g. utility bills) and the recovery of delinquent accounts. Also included is the outright purchase of delinquent accounts and debts and subsequent recovery.

87903 Telephone answering services

Services consisting in the provision of telephone answering services. Included are telephone call forwarding services (excluding paging services), and telephone wake-up services.

87904 Duplicating services

Services consisting in the provision of duplicating services. Included are blue printing, photocopying, mimeographing, photostating, and other duplication services other than printing.

87905 Translation and interpretation services

Services consisting in the provision of translation and interpretation services. Translation services generally relate to the rewriting of texts from one language to another; while interpretation services are generally concerned with stating orally in one language what has been stated orally in another language.

87906 Mailing list compilation and mailing services

Services consisting in compiling and selling the use of lists of names and addresses from telephone directories and other sources, or in sending materials (e.g. advertising material, information material) by envelope addressing, stuffing, sealing, metering and mailing.

87907 Specialty design services

Services consisting in creating designs and preparing patterns for a variety of products by harmonizing aesthetic considerations with technical and other requirements. Included in this category are furniture designs, interior designs and decorations and aesthetic designs for various other consumer products. Design services for industrial products are classified in subclass 86726 (Engineering design services n.e.c.).

Exclusion: Graphic design services are classified in group 871 (Advertising services).

87909 Other business services n.e.c.

Services generally provided to businesses, not elsewhere classified. Included here are business brokerage services, appraisal services other than for real estate, secretarial services, demonstration and exhibition services, etc.

DIVISION 88 AGRICULTURAL, MINING AND MANUFACTURING SERVICES

Part Four

CORRESPONDENCE TABLES BETWEEN ISIC, REV.3, AND CPC

The coding system of the CPC was developed in such a way that there is no longer a linkage in the CPC codes reflecting the industrial origin of products following ISIC, Rev.3. In order to show the correspondence between ISIC, Rev.3 and CPC to users interested in retracing the industrial origin of broad product categories, two separate tables (tables 1 and 2) have been developed.

The two tables actually serve a similar purpose, i.e. to show the industrial structure of production, relating outputs defined in terms of broad CPC categories to broad industry categories following ISIC, Rev.3. However, table 1 uses the ISIC, Rev.3, framework as starting point, indicating where the outputs of industries are classified in the CPC. Whenever broad CPC output categories originate from more than one broad ISIC, Rev.3, industry, this fact is indicated by an asterisk behind the CPC division code. Table 2 is the counterpart of table 1, using the CPC framework as starting point. It is, in fact, an aggregated version of the detailed classification given in the present publication, which already contains a column referring to the industrial origin of products, but relating CPC and ISIC, Rev.3, at their most detailed levels. In table 2, reference is sometimes being made to ISIC, Rev.3, groups (three-digit categories) in cases where such reference is more specific and possible without splitting.

It is hoped that tables 1 and 2 will provide guidance specifically to users interested in using ISIC, Rev.3, and CPC at a more aggregated level, and who need information on the industry vs. output relationship for particular analytical needs.
